1. GENERAL DATA

Three materials: metal, plastic, rubber
IP 44 from 16 to 63A
Integrated cable gland on the entire range
Captive external screws, stainless steel
Direct transfer range which can be used to replace old Martin Lunel stock.
Nickel-plated brass pins.

Plugs and mobile sockets

- Plastic for ELV
- Metal, plastic, rubber for 16/32 IP44
- Plastic, rubber for 63 IP44
- Plastic for 63A and 125A IP66/67
- Accepts different cable Ø thanks to the peelable ring on the cable gland.

Stainless steel captive screws

The seal is guaranteed by an internal cable gland

Pull-out protection is provided by the powerful, uniform clamping system with two half-clips around the entire cable

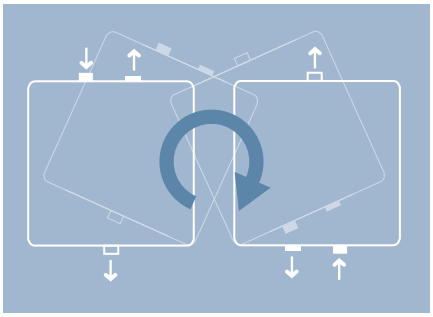

1. GENERAL DATA (continued)

Socket inlet and housing (panel and surface mounting)

The panel mounting socket may be installed directly on a unit or cabinet wall after cutting or drilling.
it is supplied with a flat seal which is sized to ensure it provides a seal with the housing to which it is fixed.
The surface mounting sockets are made by assembling the panel mounting socket or appliance inlet on the housing (simple or through supply). Some 63A and 125A surface mounting sockets are supplied assembled.

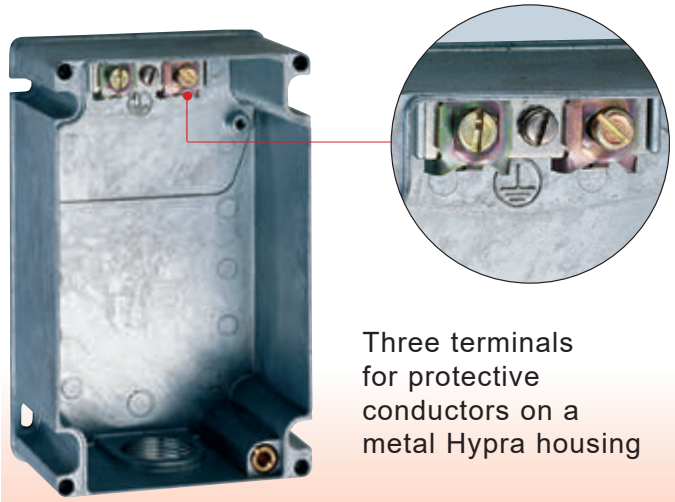

Housings for surface mounting installation
Most of the housings in the Hypra range are reversible and enable cables to be fed in either from the top or bottom.

To facilitate the installation of these housings, the mounting dimensions are engraved on the rear of the housing.

PLEASE NOTE:

The metal through housings have three terminals for protective conductors:
- the first is intended to receive the protective conductor coming from the supply
- the second is intended for reconnecting the protective conductor for another application
- the third is intended for connecting the socket inlet (connector provided).

Three terminals for protective conductors on a metal Hypra housing

LV 32 A (p. 501, 505)
Equipped with 2 connected earth terminals, and 1 external terminal on the metal housing (decree dated 14/11/88)

Material	Weight (kg)
Plastic	0.24
Metal	0.65

LV 63A

Equipped with 2 connected earth terminals, and 1 external terminal on the metal housing (decree dated 14/11/88)

Material	Weight (kg)
Plastic	0.67
Metal	1.73

4. TECHNICAL DATA

4.1 Glow wire resistance
- 850°C for active parts
- 650°C for other components

4.2 Dielectric strength
3000V 50Hz

4.3 Temperature of use
Able to operate at:
- 50° to + 100°C the products have been previously wired above -20°C and there must be no mechanical constraints below -25°C.

4.4 UV resistance
- No change in colour or alteration to the material
  Radiation intensity: 550 W/m^2
- Test duration: 168 hours
- Infrared and ultra-violet filter in order to get as close to the solar spectrum as possible.

4.5 Ageing test
Thermoplastic material:
Ageing 5 days at 100°C - No cracks in the material should appear
Flap spring strength:
5000 opening/closing actions performed - Result compliant
Seal strength:
Result compliant: No dust or water in IP66/67 products after 7 days of ageing at +80°C.

- 125A LV: from 3 to 4 Nm for Phase and Earth from 0.7 to 1 Nm for Pilot

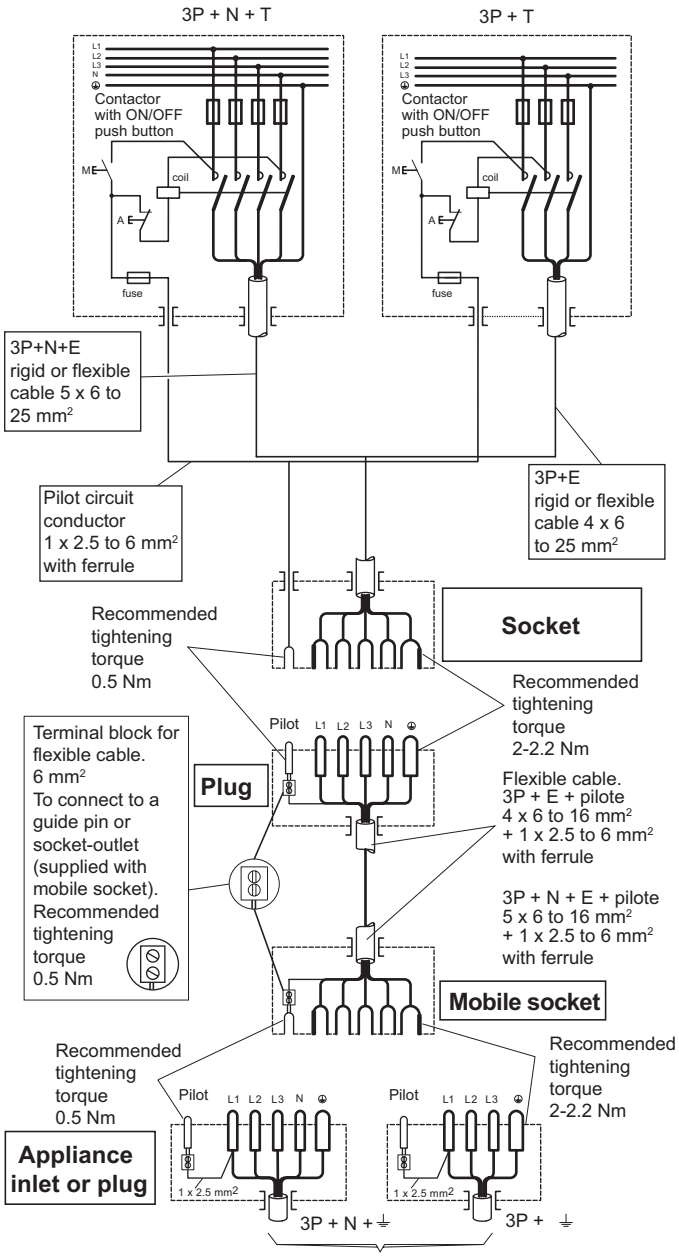

6. WIRING CHART

Wiring chart example

Breaking via guide wire:

The guide wire is a control conductor used with the power conductor.
If it is interrupted, it breaks the power circuit using a contactor.
This arrangement provides an electrical solution to the requirement for breaking circuits in excess of 32A (decree dated 14/11/88). An additional (shorter) pin is therefore added to the various models of sockets to perform this "guide wire" function.

Wiring chart example with guide circuit
Power on via push button
(mandatory for compliance in France with the decree dated 14/11/88)

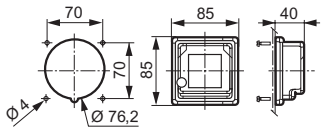

7. STANDARDS AND DECREES

- IEC 60309-1 and NF EN 60309-1 (design rules)
- IEC 60309-2 and NF EN 60309-2 (dimensional interchangeability requirements)
- IEC 60529 and NF EN 60529 (IP)
- IEC 62262 and NF EN 62262 (IK)
- Decree dated 14/11/88

8. ACCESSORIES

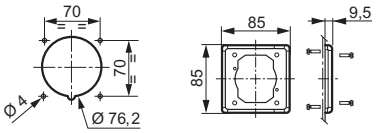

IP55 adapter socket for Mosaic 2-module mechanism
(excluding special surface mounting)
Cat. No: 0 539 49

Adapter plate for ELV socket
(mounting on pre-drilled Hypra units)
Cat. No: 0 521 19

Blanking plug
Rubber material.
Can be adapted to appliance inlets or plugs.
