Heavy Weight Mig Welding Glove

This Cut Level E MIG welding glove, made with premium cow grain leather and reinforced stitching, offers superior protection against cuts, heat, and abrasion. Its long cuff ensures extended coverage, while the green colour-coded design signifies the high cut resistance this glove provides..

Key Features:

- Provides advanced protection against high cut hazards, making it ideal for tasks involving sharp or jagged materials in demanding welding and industrial environments.
- Crafted from high-quality cow grain leather for a smooth, durable surface that enhances comfort, flexibility, and abrasion resistance, ensuring optimal performance during prolonged use.
- Offers excellent resistance to heat and molten metal splatter, protecting hands during MIG welding and other high-temperature applications.
- Double-layer reinforcement in critical wear zones improves durability and grip strength, ensuring reliable performance in heavy-duty tasks.
- Long cuff design shields wrists and forearms from heat, sparks, and debris, providing added safety in hazardous environments.
- Aramid thread stitching ensures strong, durable seams for long-lasting performance, even under demanding conditions.
- The vibrant green colour-coded cuff aligns with Traffi's Cut Level E colour scheme, providing immediate and clear identification of the glove's performance level for enhanced workplace safety and compliance.
- It's built to withstand tough industrial environments, with high resistance to wear, tear, and repeated use.

Ideal for:

- MIG Welding
- Metal Fabrication
- Manufacturing and Assembly
- Construction

Technical Specifications	
Size Range:	5-13
Outer:	Cow Split Leather with Aramid & Cotton Lining
Conditions	

Packaging	
Qty/bag:	10 pairs
Qty/carton:	60 pairs
