MKX25-220V

Product# # 7480-19190

Gates hose cutters and steel tube cutters are robust and compact machines, distinguishing themselves by their safe and high-quality cutting function. Our range of electrical cutters are all hand controlled for guided cutting, thus allowing for optimal speed control and a reduction of blade damage. The blades are positioned close to the powerful motors to limit vibration which enhances the durability and reduces maintenance costs. Other benefits such as low energy consumption, CE compliant brake motors for 3-phase cutting machines, built-in protection, and limited smoke production all support your working environment and personnel safety.
