CONSOLE EXTENDER

KVM Extender Over Cat5e - SVGA & PS/2

The KVM Console Extender, allows users to control a computer up to 150 Mtrs away using a CAT5 RJ45 Patch lead. It supports a maximum resolution of 1024 x 768, and allows two consoles to control one computer. Switching between consoles is as easy as pressing a push button or entering hot-key commands from either keyboard. There is no interface card or software to install and it is independent of the computer operating system.

Features

- Local and Remote Units supplied in the same box
- Cat 5 / 5E / 6 UTP Cable is used to connect the Local Unit to the Remote Unit
- No additional software required, Operating System independent
- Allows Remote Unit (keyboard, mouse and monitor) to be up to 150 Mtrs from the Local Unit
- Video Compensation can be adjusted by hotkey to ensure the optimum signal quality for any length of cable within the 150 Mtr limit
- Allows a single computer to be shared between the Local and Remote locations
- Beep confirmation for every keystroke or button press
- Support for standard PS/2 Keyboard & Mice, including Microsoft IntelliMouse
