'Cig-Arrête© SD Evolution' Infra-Red remote Controller (Part No CSA-IR2)

The Cig-Arrête® SD Evolution range is completely configurable using the remote controller.

Part No CSA-IR2 provides all the functionality to control all the products in the SD Evolution range at a distance of 6 metres from the product.

Colour coded, the remote controller allows complex configurations of Cig-Arrête, SpeechPOD and RadAlert products, with simple feedback in the language of your choice to ensure that you have configured the product correctly.

All you need is one controller, no matter how many SD Evolution products you have in your facility.
