

Post & base system

Product code: Post01 (post), Post02 (base)

Overview

The Skipper post is the amazing system for the successful Skipper product line. Simply attach the base to the post and pour in water or sand for extra strength and stability. The Skipper unit attaches firmly to the top, just as with a traffic cone.

Product Specifications

Width: 500mm	**Height: 1m**
Depth: 500mm	**Weight: 2.3kg**

Key selling points

- Made specifically for the Skipper unit
- An attractive alternative to using standard traffic cones
- Perfect for use in indoor or outdoor environments

Key features

- Each post comes with 2x reflective, high visibility strips
- Pour water or sand into the base for extra stability
- Holds the Skipper unit securely in place

The post twists into the base. The Skipper unit then simply clicks into place on the top of the post with an interference fit

Product FAQs

Q. Can I use a combination of cones and posts?
A. The Skipper post is 1m tall. It's designed to be used with other Skipper posts, but can also be used with traffic cones of the same height

Q. How heavy is the base once it's filled with water or sand?
A. If using water, the base weighs approximately 12.3kg when filled to the maximum level
