General Information

Waterpump Pliers
“Made in Germany” is a label of quality, accuracy and experience. All these factors play a role in the production of our water pump pliers. All these wrenches are hardened and tempered, drop-forged from chrome vanadium steel and are thus well-suited to the highest demands over long service lifetimes. To ensure safe working, the jaws of the wrenches are double-toothed, the gripping teeth additionally induction-hardened and the tools have an integrated anti-pinch mechanism.

Prepared for anything
For many heating engineers and plumbers, the exception proves to be the rule – for example, when they are called to deal with burst water pipes. They do not know in advance what to expect. But with the right selection of versatile tools, every problem becomes a routine task. The NWS tool compilation provides the plumber with tools that are just right and durable for every occasion. And if they need to get to grips with large-diameter pipes, they can do just that with the ClassicPlus.
