

Workflow Station and Readers

Transfer video, photos, and audio from multiple sources at once

Kingston's Workflow Station and Readers provide a flexible system to transfer video, photos, and audio from multiple sources at once[1]. Expedite your post-production workflow and create a file offload setup that fits your needs. The Workflow Station Dock is customizable so you can use only the USB miniHub, SD readers, or microSD readers that your shoot requires. Whether you're on a 4K/8K multi-cam shoot with portable audio recorders for each host, or filming B-Roll with drones and GoPros, you can connect up to four readers to the dock simultaneously and transfer footage quickly. The Workflow Station and Readers support USB 3.2 speeds which get you to your post-production process faster than ever. For added flexibility the card readers can be used on-the-go. When you need to shoot on location simply drop the hub or readers you need into your bag and connect them to your laptop using the included USB cable.

- Transfer video, photos, and audio from multiple sources at once.
- Use the readers with the dock or on the go[1]
- Flexible system to help future proof your workflow
- Incredible USB 3.2 speeds
