INSULATING GLOVE BOX
CG-35/2

FIELD OF USE

Especially designed to protect insulating gloves of all classes 00 to 4 (low voltage to high voltage).
This box ensures to the gloves a mechanical protection against shocks and UV rays.
It can be fixed on a wall, in a substation, or be used as a carrying box and a storage box, for example in a car. The box can be placed in a vertical position.
The translucent cover allows to check the gloves are inside.
In addition, it is recommended to keep on the insulating gloves in their bag.
The ergonomic handle allows to have a quick and easy opening of the box.
In a red colour, the box is more visible.
