MagPro™ Elite Magnetic Privacy Screen Filter for MacBook Pro 14” (2021)

Part Number: K58370WW | UPC Code: 0 85896 58370 7

Privacy begins on screen.

The move toward hybrid working means that the modern workplace is no longer a single, easy-to-secure location. Users can be working anywhere, with an increased chance of visual hacking.

Owners of the MacBook Pro 14” require a privacy screen filter that can be quickly attached and detached, allowing the laptop to close completely to enter sleep mode.

The MagPro™ Elite Magnetic Privacy Screen Filter attaches seamlessly to the MacBook Pro’s magnetic frame, requiring no inconvenient adhesives. Allowing the device to close completely, the screen filter narrows the viewing angle to ±30°, limiting the chance of unauthorised viewing and reducing harmful blue light and glare.

Features include:

- **Seamless magnetic attachment**
- **Allows laptop to close and enter sleep mode**
- **Limited viewing angle**
- **Blue light reduction**
- **Low reflective coating**
- **Reversible viewing**

Product Sheet

MagPro™ Elite Magnetic Privacy Screen Filter for MacBook Pro 14" (2021)

Part Number: K58370WW | UPC Code: 0 85896 58370 7

Seamless Magnetic Attachment

Privacy screen filter conveniently attaches to the MacBook Pro frame with magnets and can be easily detached. No inconvenient and potentially damaging adhesives required.

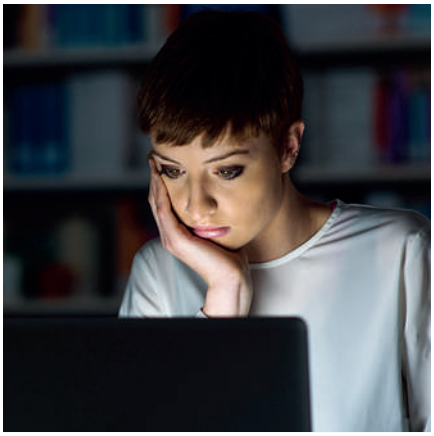

Allows Laptop to Close and Enter Sleep Mode

Even with the privacy screen filter attached, the MacBook Pro can close completely to enter sleep mode.

Limited Viewing Angle

Narrows the field of vision to ±30°, helping you keep the information on your screen private and reducing the chance of a visual data breach in the office or in a public setting.

Blue Light Reduction

Filters out harmful rays by up to 30%, easing eye strain and reducing the chances of blue light interrupting natural sleep patterns.

Low Reflective Coating

Reduces glare from outside light sources for improved viewing clarity.

Reversible Viewing

One side has a matte finish to reduce glare and fingerprints. The other side is glossy and provides a clearer view of the screen. Magnets make it easy to detach and reattach.
