TECHNICAL DATA SHEET

SPEEDY WIRE GEL

LUBRICANT FOR THREADING ANY TYPE OF CABLES,
FOR WIRING ELECTRICAL, TELEPHONE AND FIBER OPTIC SYSTEMS

Anti-drip lubricant gel for inserting any type of cable, in both rigid or corrugated ducts, pipes etc. with high lubricant power, high fluidity and high viscosity.

It facilitates the insertion of cables in pipes, greatly reducing the friction between the cable, the pipe and the other cables in the ducts, even in particularly difficult paths.

During its application, SPEEDY WIRE GEL adheres perfectly to the cable and avoids the dripping that can occur during its use.

SPEEDY WIRE GEL is suitable for the use also in winter, thanks to its freezing temperature that is -5°C

Water-based, non toxic , neutral and biodegradable. Any trace of gel on the hands can be removed easily with water and soap.

PRODUCTS

Product	Package	Wrapping
SPEEDY WIRE GEL	1 lt bottles	12-piece pack

USE

Apply SPEEDY WIRE GEL on the cable with a sponge or a cloth and introduce it into the pipe, then proceed with threading. It can be used for all types of extruded electrical cables.
FOR PROFESSIONAL USE

TECHNICAL DATA

PROPERTY	TYPICAL VALUE
Appearance	Transparent gel with high viscosity
Colour	Transparent
Odour	Odourless
Viscosity	3400 ± 200 cps
Solubility in water	Completely soluble
PH	Approx. 7.01 ± 0.5
Specific weight	Approx. 1 gr/cm^3
Use temperature	-5 + 50 °C
Toxicity	Not toxic, water based

WARNING

ELECTRIC HAZARD,
The gel is electrically conductive: do not apply on live cables, or on energized components or parts.

DANGER SLIPPERY!
The product is extremely sliding! Do not walk on the gel. It can become very slippery.

Store the product closed, in the original pack, in a fresh and dry place.
