Description

The GearWrench 11-Piece. 3/8 in. Drive SAE Crowfoot Wrench set runs from size 3/8 in. to 1 in. It is perfect when a typical socket is too large or the application prevents you from getting over top of the fastener. This set is made from premium alloy CV Steel.

A crowfoot wrench is A type of wrench designed to fit some of the same drive handles as the regular socket but non-cylindrical in shape, the ends are the same as those found on the open-end, box-end, or the flare-nut wrenches, these sockets use for use where space restrictions preclude the use of a regular socket. Also used in place of conventional open/box wrenches where the wrenches are large, so the crow's-foot wrench is much cheaper, or where space and weight are at a premium
