LASER ENGRAVED - NO STICKERS
WON'T RUST

Overview **Videos**

Ragni Stainless Steel corner trowels feature a Japanese Stainless-Steel blade for and even wear, producing an excellent finish and long tool life. They are available in external and 3 variations of internal, to suit the customers need regarding sizes and accessing awkward areas. The trowels have a rounded corner blade design, front and back which was developed by Ragni to leave a perfect finish, no lines and no “digging in”. The blades are highly flexible and will flex to 90 degrees which is required for corners that are not true. They feature a soft-grip 2 component handle with finger guard for comfort and are a key requirement for any plasterer.
