

PRIMEX
ABRASIVES' SIGNATURE

QUICK-CHANGE DISC

SURFACING

General purpose clean & finish

APPLICATIONS

- Very open structure, high resistance to clogging.

ADVANTAGES

- Ideal for all retouching work on flat or profiled workpiece.
- Quick change in no time for optimized work.
- For metals and painted surfaces.
- Does not distort the workpiece.

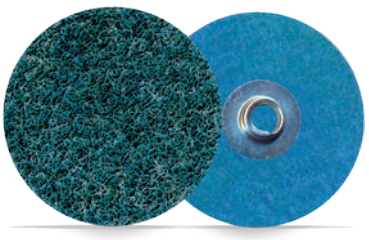

AVAILABLE SHAPES

Thick

Medium

Very fine

Discs

To be used with a quick-change disc holder

TECHNICAL DATA

• Backing:	synthetic cloth
• Bonding:	resin
• Grain:	non-woven synthetic fiber
• Coating:	open
• Grit:	Thick to very fine

FOCUS USE

- **Deburring:** removal of separation marks / removal of burrs on molded plastic parts.
- **Homogenization**: small surface defects or handling marks.
- **Cleaning:** removal of light oxidation from surface / preparation of surface before painting.
- **Finish:** brushed finish on stainless steel after removal of welds / cosmetic finish on aluminium parts.
