AOC USB3.0 CABLES

10m ~ 30m AOC USB3.0 Extension Cables

USB3.0 Active Optical Cable (AOC) use fibre optic cable to carry the USB3.0 signal. This means that the signal can be carried much further than a traditional copper cable and reduces the risk of interference.
USB3.0 AOC cables also have copper wires inside which carries the power so no external power adapter is required.

Not backwards compatible with USB2.0 ports or devices

Features

- USB3.0 Active Optical Cable
- Type A Male to Type A Female
- Supports 5Gbps
- Frustration free packaging

Specifications

- Metal Connectors
- 4 Fibre cores / 4 Copper cores
- Cable Outer Diameter 4.5mm
