OMRON

Market Trends in Casino Gaming Machines

- One of the market trends in casino gaming machine is getting multiple & larger display, even 4K HD screen quality. The trend extends to the operation deck and LCD size are larger.
- SPIN button will remain as a physical button to provide operation feeling (i.e. spending money for game) but needs to match new cabinet design.
- Casino gaming companies are searching for new solution that can extend performance area as well as content expansion.

Current slot machines

Partial LCD operation deck + Normal BB

Future slot machines

Large LCD operation deck + Transparent BB

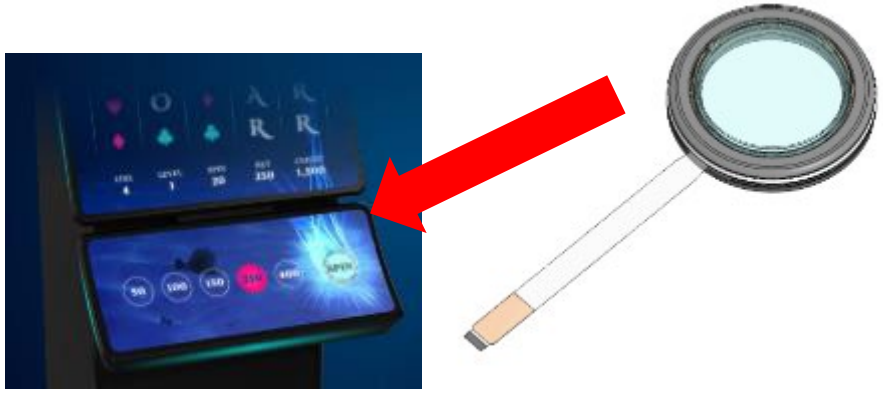

OMRON

Bash Button W7BB-X01

- Omron is proud to offer this innovative solution to address the requirements of Casino Gaming Machines.

- This is a button for the operation deck of Casino Gaming Machines. We call this as **General Purpose Bash Button – GPBB**.

General Purpose Bash Button
