ENHA

HELMET ACCESSORIES

E-MAN

The **E-MAN** helmet series is specifically designed for electrical use, thanks to its arc flash integrated visor.

Two versions are available: E-MAN 7000 for Class II Arc Flash protection and E-MAN 4000 for CLASS I Arc Flash.

Both versions feature a wheel ratchet adjustable headband.

RADIUS

The **RADIUS** helmet series is one of the most lightweight industrial safety helmet ranges on the market.

It delivers outstanding impact protection thanks to its unique “Crashbox Inside” impact energy absorption system.

Vented and unvented versions. Standard and micro peak length are available.

ROCKMAN

The **ROCKMAN** helmet series is one of our best selling option, providing a great economical solution.

ROCKMAN C is a vented solution and ROCKMAN E is an unvented solution for electrical use. Both versions are available with pinlock or wheel ratchet adjustable headband.
