Product Description

KleenGuard® Personal Protective Equipment (PPE) enables rather than inhibits – allowing for maximum productivity and safety for you and your employees. Your employees are your most valuable asset, and KleenGuard® G10 2PRO™ blue nitrile gloves help keep them safe. Durable gloves with 0.15 mm thickness, your employees can use them with confidence to get the job done without fear of tearing or breaking. Thanks to the smart design, these powder free, ambidextrous, touch screen compatible blue nitrile gloves offer strength, comfort and protection. The textured fingertips of the touch screen gloves give employees a grippable surface for dexterity while performing sensitive tasks. The beaded cuff helps prevent roll-down and makes the disposable gloves easier to don. The strong gloves' synthetic nitrile rubber material provides extra resistance and durability when compared with latex, making them the ideal choice for hand protection, plus reducing the potential for Type 1 PPE glove associated reactions. These safety gloves are also powder free, minimising the drying effect of powder on skin and helping to avoid skin allergies and reducing the risk of contamination. Ideal for demanding, light-duty tasks and with an ambidextrous design, KleenGuard® G10 nitrile gloves are perfectly suited for any user and come in a portable dispenser box for mobility and easy access. KleenGuard® G10 2PRO™ blue nitrile gloves are AQL 1.5 (defined according to ISO 2859-1) and available in a variety of sizes from XS to XL; for other glove sizes, see product codes 54420, 54421, 54423, 54424. Nitrile glove size 0.15 mm (thick) x 24 cm (L). These blue nitrile gloves are a leading choice across a variety of industries such as transport, aerospace, electronic assembly, food processing and manufacturing because they are comfortable to wear, provide excellent tactile sensitivity, deliver reliable protection for the task at hand and offer improved cost-in-use. Making the right Personal Protection choice is difficult. Perform with distinction with KleenGuard® Personal Protective Equipment (PPE). 10 Boxes x 100 Blue, M, PPE Gloves (1,000 Total)Kimberly-Clark Professional™ personal protective equipment is only intended for occupational workplace use and must be used in compliance with all applicable health and safety laws and standards in addition to all user instructions, warnings and limitations accompanying each product. It is essential all product user instructions and laws and regulations on the use of each product be followed in order for the product to help protect the wearer. Misuse of personal protective equipment may result in injury, sickness, or death. For correct product selection and use, individuals should seek occupational health and safety advice from a suitably competent person. This product is suitable for sale in the EU.

Solution

Safer Workplace

We know staff safety is your top priority. You can rely on our solutions to protect them, their environment and your important work.

Productive Workplace

The success of your business hinges on your work efficiency. That's why our solutions are designed to help improve your productivity.

Standard R+E

Best Before Date

Products with a shelf life need to be stock controlled, to reduce risk of selling out of date goods to customers. Therefore a registration is needed for BBD and marked on the physical packaging. The goods need to be blocked for sale, when within 6 months before expiry date, as a standard rule.
(FEFO stock management required)

Lot Code

For Product Quality control the traceability of Lot codes is a requirement from the Quality Department.
(FIFO stock management required

Food Contact Regulations

This product is suitable for food contact and complies with Regulation (EC) No. 1935/2004. Furthermore, nitrile rubber gloves comply with Regulation (EC) No. 10/2011 and German Recommendation, BfR No. XXI, and paper products comply with German Recommendation, BfR No. XXXVI.

CE Mark

Simple - CAT I, Intermediate - CAT II or Complex - CAT III

CE CAT I

Trade

ISO 9001

This gives the requirements for quality management systems, is now firmly established as the globally implemented standard for providing assurance about the ability to satisfy quality requirements and to enhance customer satisfaction in supplier-customer relationships.
