Recycled spray bottle

A recycled spray bottle made in the UK out of plastic milk bottles.

Post consumer recycled (PCR) bottles are an eco-friendly way to dispense cleaning fluids without the waste and environmental impact of single use plastic bottles.

The 100% recycled and 100% recyclable r-HDPE spray bottle is made in the UK from milk bottles, and can be ordered blank or screen printed with your own design using a specially formulated ink.

This means less waste at the end of the day, it removes disposable plastic from the UK's plastic waste economy, and takes less energy to manufacturer the PCR resin than virgin plastic.

The bottle is made from 100% recycled plastic and is recyclable, while the sprayer is made from virgin plastic and can also be recycled. Printed bottles using UV ink can be recycled into car parts, pipes and clothing.

Key features & benefits

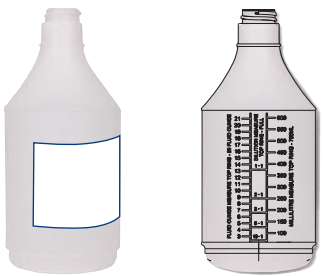

- 100% recycled and 100% recyclable plastic.
- Eco-friendly way to dispense cleaning fluids.
- Made in the UK out of milk bottles that could otherwise go to landfill.
- Can be printed in up to four colours.

Printing service

We provide a bottle printing service so you can include design and user instructions. This creates a colourful, permanent screen print for your spray bottles bottles that won't peel off, and a cost effective and visible way to promote your business. There is a minimum order quantity of 600 bottles if printed.
