CUTTING IN BRUSH

PPB00321

Product Overview

Specifically designed for the task of cutting in. Our angled stainless-steel ferrule is filled with synthetic filament, each strand tipped and flagged to make clean, crisp lines an effortless task. The short, solid beech handle aids brush maneuverability in tight, confined spaces.

- ✓ 2.5” angled cutting in brush – built for precision and speed.
- ✓ Packed with synthetic filament, each strand tipped and flagged to make clean, crisp lines an effortless task.
- ✓ A short, solid beech handle with laser engraved texture allows for a better grip and more maneuverability in tight, confined spaces.
- ✓ The angled stainless-steel ferrule, synthetic filament and solid beech handle are manufactured to last, a brush that is easy to clean and re-use time and time again.
- ✓ Best performance and finish seen when used with modern water-based paints (emulsions, silks, eggshells, satins, glosses, etc).
