MCX20-HP

Product# # 7480-19181

Gates crimpers makes safe, fast and efficient assembly of hydraulic hoses and couplings simple. All machines are custom-designed to work with a well-defined range of Gates hoses and couplings allowing production of factory-quality assemblies that fully comply with European Directives and the most stringent international standards. In addition, our self-assembly machinery offers the highest care and personal safety in your working environment (from workshops to mobile service operations and even on-site field crimping).

- Easy-to-use products are designed to ensure fast, comfortable handling and we have incorporated this also in our crimper programme.
- In our electrical-driven crimpers, a standard built-in storage rack lets you choose easy-to-reach, logically organised dies quickly.
- Gates MCX crimpers lower your maintenance costs by running grease-free.
