Grip It® Oil C5

Grip It® Oil C5 is a seamless knitted cut resistant liner with two layers of nitrile coating. Made from a combination of HPPE (high performance polyethylene) and glass fibre, the seamless liner attains maximum EN388 scores in all categories, yet is light, flexible and very comfortable. A highly versatile glove, the Grip It® Oil C5 utilises two layers of nitrile coating to provide ultimate protection and gripping ability. The first layer, which is a full coating, is soft and resilient allowing for excellent dexterity and great freedom of movement. The second layer, which is a palm coating, not only increases resistance to oils but has been engineered to provide maximum grip. This is achieved by infusing microfoam bubbles into the nitrile, maximising grip especially in wet and oily conditions. This results in a glove that delivers excellent protection, durability and a long life expectancy.

Typically used for:

- Construction Work
- Glass Handling - Wet & Dry
- Cutting & Processing
- Metal Fabrication • Engineering Work
- Oil, Petroleum & Chemical Processing
- Railway Maintenance

Case Quantity:

10 pairs per polybag
60 pairs per case
