KVM SWITCHES

Two Port USB / VGA KVM Switch

The NLKVM-USBCAB is a compact KVM switch, this allows users to control two computers from one keyboard, mouse and monitor. Two unique loose 3 in 1 cables are supplied with the compact KVM. No interface card or software is needed, installation is as easy as connecting cables from the KVM switch to your computers.

Operation is as simple as entering hot-key commands from a keyboard or pressing the button on the KVM. The NLKVM-USBCAB is independent of computer operating systems.

Features

- OS Support: Windows XP, Vista, Win 7, Windows 8, Linux and Mac OS
- Supports Hot-Plug capability
- Max Resolution: 2048 x 1536 - 250MHz Bandwidth
- Auto scan function (every 8 seconds)
- LED indicator
- Additional USB port for flash drive
- Speaker and microphone support
- Switch with either Hot-Keys or button on the KVM
