NANUK™
PROFESSIONAL PROTECTIVE CASES

988

Long, deep, rugged, and tough, **NANUK** 988 will protect and mobilize loads of gear with room to spare. It's built to go fast with stainless steel ball-bearing wheels and three spring-loaded handles that make it the perfect premium waterproof protective case to go anywhere.

Waterproof and dustproof, it's built so it can be thrown in the back of a pick-up, stacked on a pallet, taken to the set or the range with confidence. Designed with a long and deep interior of 41.75" x 13.63"x 12.5" (1060mm x 346mm x 318mm), it fits lighting equipment, tripods, camera equipment, telescopes, bunker gear, rifles, chainsaws, industrial equipment, and more.

The 988 is part of our Configurable Series. The base model equipped with three (3) ultra-strong handles and two (2) strong polyurethane large wheels with stainless steel ball bearings is for any terrain. If your needs change, the wheel assemblies on the 988 are removable and can be replaced by our custom corner caps. The 988T and 988M are lighter with no wheels to facilitate team carry deployment and to meet agency restrictions against one-person carry. The 988T and 988M also offer a lower profile for efficient warehousing and tight spaces. Both are available as custom orders.

Like all **NANUK** waterproof protective cases, the 988 is made of NK7 resin and equipped with six (6) of our legendary PowerClaw latches. The 988 is indestructible and will never open accidentally. Molded with deeper ribs and taller feet, it's highly stackable.

The 988 comes with our lifetime warranty, your assurance that we build cases to protect your most valuable gear for life. Additionally, a polycarbonate ID Window is available as an option. It attaches quickly and easily to the front of the 988. Other options include TSA Approved Latches as a retrofit kit, TSA Approved Padlocks, Panel Installation Kit, Multi-Layer Solid Foam, and Padded Dividers.
