8282 Hydrowipes
Technical Data Sheet

Description

The 8282 *Hydrowipes* are general purpose, clean room wipes made of a hydroentangled blend of 55% cellulose and 45% polyester fibers. They have excellent absorbency and strength when cleaning up spills and cleaning solutions.

Applications & Usages

The wipes are for use in controlled environments that maintain a low level of pollutants such as dust, airborne microbes, aerosol particles, and chemical vapors. They are intended for use in clean rooms, offices, and laboratories.

Features and Benefits

- **Strong blend of cellulose and polyester**
- **Super absorbent**
- **Low to no lint formation**
