TECHNICAL DATASHEET

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

*This picture is for reference to DRC-5V10W series only.

CHROME

Highlights & Features

- Class II, Double Isolation (No Earth connection is required)
- Universal AC input voltage range and full power up to 55°C
- Power will not de-rate for the entire input voltage range
- Efficiency > 77% @ 115 Vac
- Can be installed in compact cabinets
- NEC Class 2 and Limited Power Source (LPS) approvals
- Conforms to harmonic current IEC/EN 61000-3-2, Class A
- Safety approval according to IEC/EN/UL 60950-1, IEC/EN/UL 62368-1 and UL 508

Safety Standards

CB Certified for worldwide use

Model Number: DRC-5V10W1A☐
Unit Weight: 0.06 kg (0.13 lb)
Dimensions (L x W x D): 91 x 18 x 55.6 mm (3.58 x 0.71 x 2.19 inch)

General Description

The DRC-5V10W1A☐ is part of the Chrome DIN rail power supply series, which is designed for use in compact cabinets for home automations and the food and beverage industry. Delta's Chrome DIN rail power supply series offers double isolated input. This means that no Earth connection is required thus resulting in low leakage current. This product provides a universal input voltage range of 90-264 Vac, and a wide temperature range of -25°C to 71°C. The Chrome series is certified to safety standard according to IEC/EN/UL 60950-1, IEC/EN/UL 62368-1 and UL 508. NEC Class 2 and Limited Power Source (LPS) approvals are available for this product.

Model Information

Chrome DIN Rail Power Supply

Model Number	Input Voltage Range	Rated Output Voltage	Rated Output Current
DRC-5V10W1A☐	90-264 Vac (125-375 Vdc)	5 Vdc	1.5 A

Model Numbering

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Specifications

Input Ratings / Characteristics

Nominal Input Voltage		100-240 Vac
Input Voltage Range		90-264 Vac
Nominal Input Frequency		50-60 Hz
Input Frequency Range		47-63 Hz
Nominal DC Input Voltage*		125-375 Vdc
Input Current		< 0.3 A @ 115 Vac, < 0.2 A @ 230 Vac
Efficiency at 100% Load		> 77% @ 115 Vac, > 76% @ 230 Vac
Max Power Dissipation	0% load	< 0.15 W @ 115 Vac & 230 Vac
	100% load	< 2.24 W @ 115 Vac, < 2.35 W @ 230 Vac
Max Inrush Current (Cold Start)		< 15 A @ 115 Vac, < 30 A @ 230 Vac
Leakage Current		< 0.25 mA @ 240 Vac

*Fulfills test conditions for DC input. Safety approval for DC input can be obtained upon request.

Output Ratings / Characteristics**

Nominal Output Voltage		5 Vdc
Factory Set Point Tolerance	No potentiometer	4.75-5.25 Vdc
Output Current		0-1.5 A (7.5 W max.)
Output Power		7.5 W
Line Regulation		< 1.0% (@ 90-264 Vac input, 100% load)
Load Regulation		< 2.0% (@ 90-264 Vac input, 0-100% load)
PARD*** (20 MHz)		< 100 mVpp
Rise Time		< 70 ms @ nominal input (100% load)
Start-up Time		< 3,000 ms @ nominal input (100% load)
Hold-up Time		> 10 ms @ 115 Vac, > 60 ms @ 230 Vac (100% load)
Dynamic Response (Overshoot & Undershoot O/P Voltage)		± 5% @ 90-264 Vac input, 10-100% load (Slew Rate: 0.1 A/μs, 50% duty cycle @ 5 Hz to 100 Hz)
Start-up with Capacitive Loads		3,000 μF Max

**For power de-rating from 55°C to 71°C, see power de-rating on page 3.
***PARD is measured with an AC coupling mode, 5 cm wires, and in parallel with 0.1 μF ceramic capacitor & 47 μF electrolytic capacitor.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Mechanical

Case Cover		Plastic
Dimensions (L x W x D)		91 x 18 x 55.6 mm (3.58 x 0.71 x 2.19 inch)
Unit Weight		0.06 kg (0.13 lb)
Indicator	Green LED	DC OK
Cooling System		Convection
Terminal	Input	M4 x 2 Pins (Rated 300 V/16 A)
	Output	M4 x 2 Pins (Rated 300 V/16 A)
Wire	Input / Output	AWG 24-12
Mounting Rail		Standard TS35 DIN Rail in accordance with EN 60715
Noise (1 Meter from power supply)		Sound Pressure Level (SPL) < 25 dBA

Environment

Surrounding Air Temperature	Operating	-25°C to +71°C
	Storage	-25°C to +85°C
Power De-rating		> 55°C de-rate power by 2.5% / °C
Operating Humidity		5 to 95% RH (Non-Condensing)
Operating Altitude		0 to 2,000 Meters (6,560 ft)
Shock Test	Operating	IEC 60068-2-27, Half Sine Wave: 4 G for a duration of 22 ms, 3 shocks for each 3 directions, 9 times in total
Vibration	Operating	IEC 60068-2-6, Sine Wave: 10-500 Hz @ 19.6 m/S² (2 G peak); 10 min per cycle, 60 min for all X, Y, Z directions
Over Voltage Category		II
Pollution Degree		2

Protections

Overvoltage	< 7.25 V, SELV Output, Latch Mode
Overload / Overcurrent	> 105% of rated load current, Hiccup Mode, Non-Latching (Auto-Recovery)
Over Temperature	> 75°C Surrounding Air Temperature @ 100% load, Latch Mode
Short Circuit	Hiccup Mode, Non-Latching (Auto-Recovery when the fault is removed)
Internal Fuse at L pin	T 1 A H
Degree of Protection	IP20
Protection Against Shock	Class II (No PE* connection is required)

*PE: Primary Earth

Reliability Data

MTBF	> 500,000 hrs. as per Telcordia SR-332 I/P: 100 Vac, O/P: 100% load, Ta: 35°C
Expected Cap Life Time	10 years (115 Vac & 230 Vac, 50% load @ 40°C)

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Safety Standards / Directives

Safety Entry Low Voltage		SELV (IEC 60950-1)
Electrical Safety	TUV Bauart	EN 62368-1

Engineering Data

Output Load De-rating VS Surrounding Air Temperature

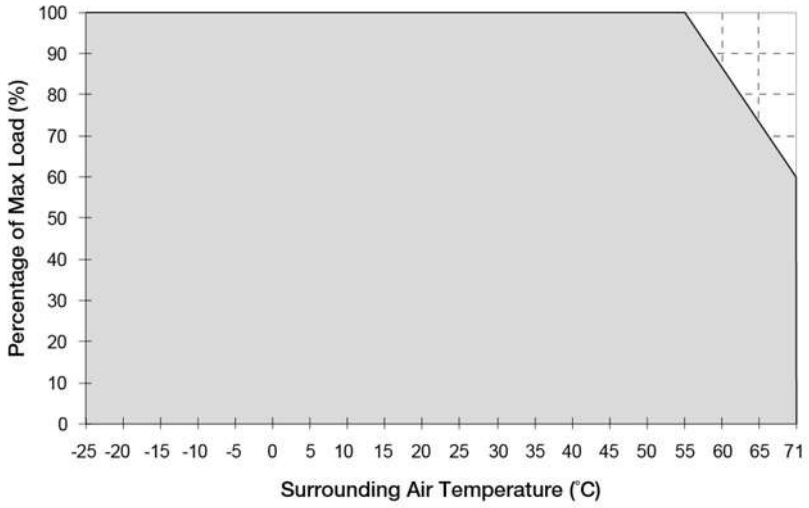

Fig. 1 **De-rating for Vertical Mounting Orientation**
> 55°C de-rate power by 2.5% / °C

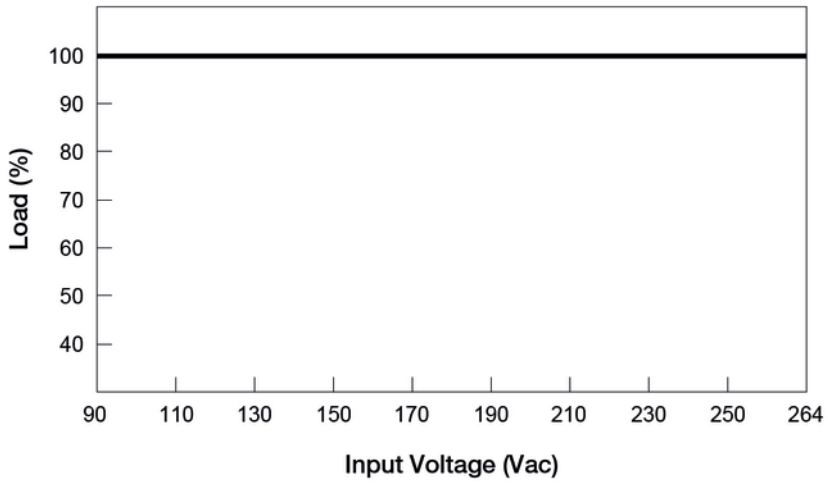

Note

1. Power supply components may degrade, or be damaged, when the power supply is continuously used outside the shaded region, refer to the graph shown in Fig. 1.
2. If the output capacity is not reduced when the surrounding air temperature exceeds its specification as defined on Page 3 under “Environment”, the device may run into Over Temperature Protection. When activated, the output voltage will go into latch mode and recover when AC power recycles.
3. In order for the device to function in the manner intended, it is also necessary to keep a safety distance as recommended in the safety instructions while the device is in operation.
4. Depending on the surrounding air temperature and output load delivered by the power supply, the device can be very hot!
5. If the device has to be mounted in any other orientation, please contact **info@deltapsu.com** for more details.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Output Load De-rating VS Input Voltage

- No output power de-rating across the entire input voltage range

Assembly & Installation

The power supply unit (PSU) can be mounted on 35 mm DIN rails in accordance with EN60715. The device should be installed with input terminal block at the bottom.

Each device is delivered ready to install.

Mounting

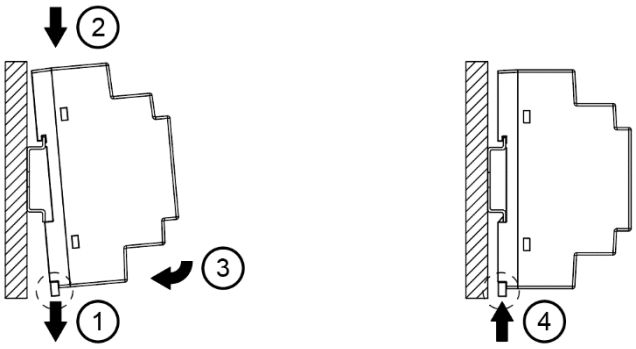

Fig. 2.1 Mounting

Snap on the DIN rail as shown in Fig. 2.1:

1. Pull the unit's DIN rail latch OUT.
2. Tilt the unit slightly upwards, hook the top end onto the DIN rail and push downwards until stopped.
3. Position the bottom front end against the DIN rail.
4. Push the unit's latch DIN rail IN to lock.

Dismounting

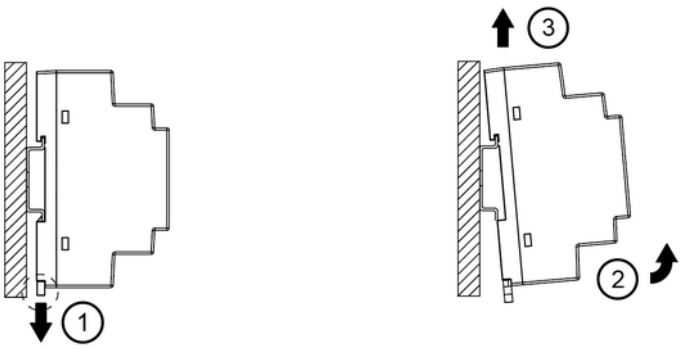

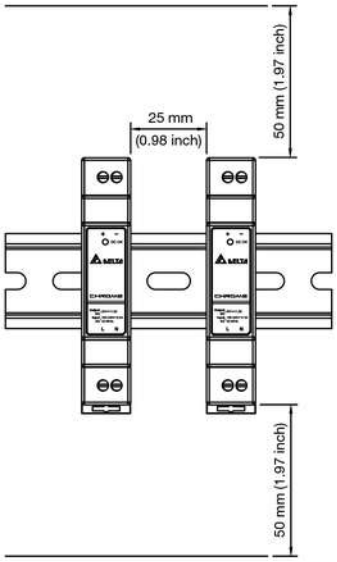

Fig. 2.2 Dismounting

To uninstall, pull the unit's DIN rail latch OUT as shown in Fig. 2.2. Tilt the bottom part of the unit out. Push the unit up and pull out from the DIN rail.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

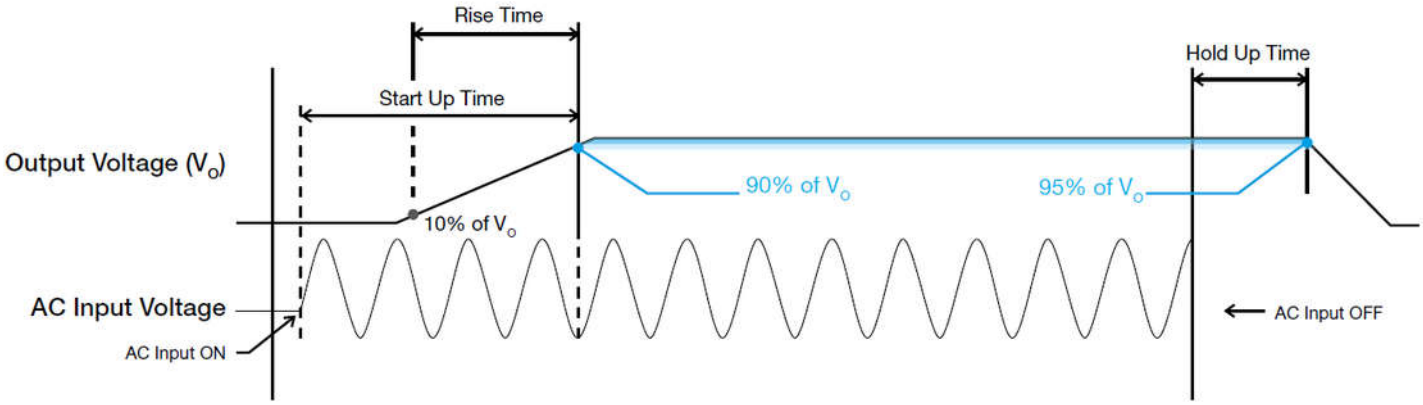

Safety Instructions

- ALWAYS switch mains of input power OFF before connecting and disconnecting the input voltage to the unit. If mains are not turned OFF, there is risk of explosion / severe damage.
- **To guarantee sufficient convection cooling, keep a distance of 50 mm (1.97 inch) above and below the device as well as a lateral distance of 25 mm (0.98 inch) to other units.**
- Note that the enclosure of the device can become very hot depending on the surrounding air temperature and load of the power supply. Risk of burns!
- DO NOT insert any objects into the unit.
- Hazardous voltages may be present for up to 5 minutes after the input mains voltage is disconnected. Do not touch the unit during this time.
- The power supplies are built in units and must be installed in a cabinet or room (condensation free environment and indoor location) that is relatively free of conductive contaminants.

Functions

■ **Graph illustrating the Start-up Time, Rise Time, and Hold-up Time**

Start-up Time

The time required for the output voltage to reach 90% of its final steady state set value, after the input voltage is applied

Rise Time

The time required for the output voltage to change from 10% to 90% of its final steady state set value.

Hold-up Time

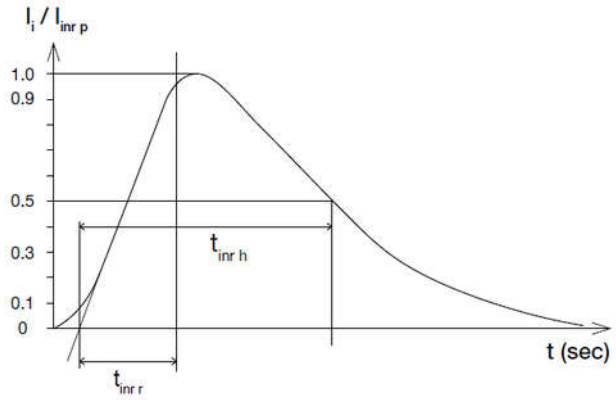

Time between the collapse of the AC input voltage, and the output falling to 95% of its steady state set value.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Inrush Current

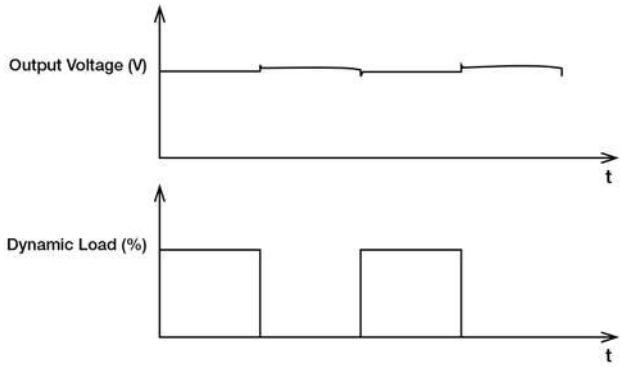

Inrush current is the peak, instantaneous, input current measured and, occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.

Dynamic Response

The power supply output voltage will remains within ±5% of its steady state value, when subjected to a dynamic load from 10% to 100% of its rated current.

- **50% duty cycle / 5 Hz to 100 Hz**

External Input Protection Device

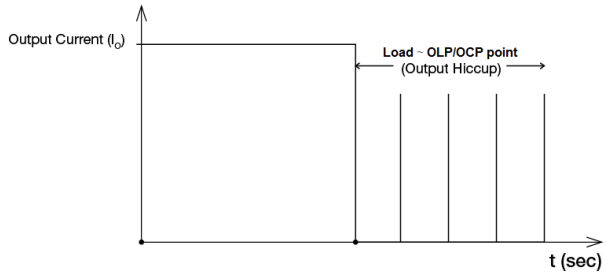

The unit is protected with internal fuse (not replaceable) at L pin and it has been tested and approved on 20 A (UL) and 16 A (IEC) branch circuits without additional protection device. An external protection device is only required if the supplying branch has an ampacity greater than above. Thus, if an external protective device is necessary, or, utilized, a minimum value of 8 A B- or 4A C- characteristic breaker should be used.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Overload & Overcurrent Protections (Auto-Recovery)

The power supply's Overload (OLP) and Over current (OCP) Protections will be activated when output current (I_O) exceeds its specification as defined on Page 3 under "Protections". In such occurrence, once the power supply has reached its maximum power limit, the protection is activated and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition of the OLP and OCP is removed and I_O is back within the specifications.

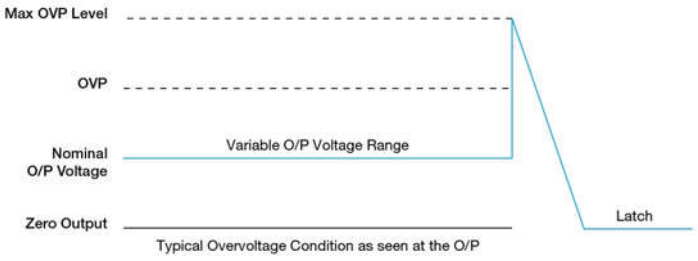

It is not recommended to prolong the duration of I_O when it is less than OLP/OCP point, but greater than 100%, since it may cause damage to the PSU.

Short Circuit Protection (Auto-Recovery)

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

Overvoltage Protection (Latch Mode)

The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 3 under "Protections". Power supply will latch, and require removal/re-application of input AC voltage in order to restart.

Over Temperature Protection (Latch Mode)

As described in load de-rating section, the power supply also has Over Temperature Protection (OTP). In the event of a higher operating temperature at 100% load; or, when the operating temperature is beyond what is recommended in the de-rating graph, the OTP circuit will be activated. When activated, power supply will latch, until the surrounding air temperature drops to its normal operating temperature or the load is reduced as recommended in the de-rating graph. Removal/re-application of input AC voltage will then be required in order to restart.

Operating Mode

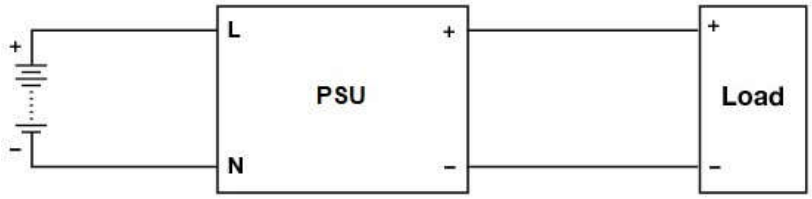

Fig. 3 DC Input Operation Connection Diagram

■ DC Input Operation

Step 1.
Use a battery or similar DC source.

Step 2.
Connect +pole to L and -pole to N.

Step 3.
Connect the PE terminal to an earth wire or to the machine ground.

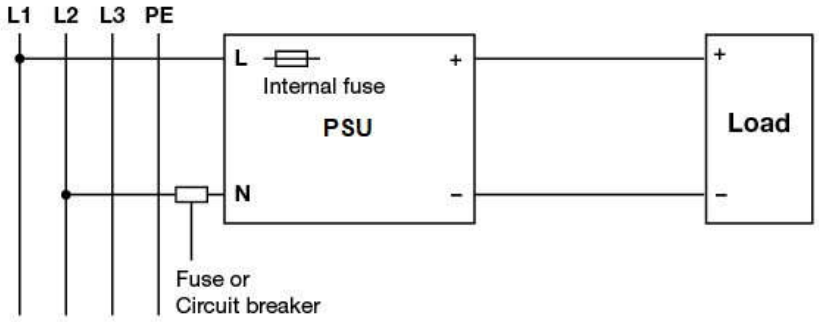

Fig. 4 2 of 3 Phase System Input Operation Connection Diagram

■ 2 of 3 Phase System Input Operation

Delta's Chrome can use on 2 of 3 phase system. Please refer to the following step.

Step 1.
The input voltage applied from Line to Neutral is below the maximum rated input. The input voltage shall be below 240 Vac +10%.

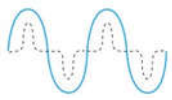

Step 2.
The external protector is needed on N (Neutral) input line to secure a safety. N line does not have internal fuse protection. An appropriate fuse or circuit breaker should be connected in series with N input line connection like the following.

Chrome DIN Rail Power Supply

5 V 7.5 W 1 Phase (Class II & NEC Class 2) / DRC-5V10W1A☐

Others

PFC – Norm EN 61000-3-2

Line Current Harmonic content

Typically, the input current waveform is not sinusoidal due to the periodical peak charging of the input capacitor. In industrial environment, complying with EN 61000-3-2 is only necessary under special conditions. Complying to this standard can have some technical drawbacks, such as lower efficiency as well as some commercial aspects such as higher purchasing costs. Frequently, the user does not profit from fulfilling this standard, therefore, it is important to know whether it is mandatory to meet this standard for a specific application.

Attention

Delta provides all information in the datasheets on an “AS IS” basis and does not offer any kind of warranty through the information for using the product. In the event of any discrepancy between the information in the catalog and datasheets, the datasheets shall prevail (please refer to **www.DeltaPSU.com** for the latest datasheets information). Delta shall have no liability of indemnification for any claim or action arising from any error for the provided information in the datasheets. Customer shall take its responsibility for evaluation of using the product before placing an order with Delta.

Delta reserves the right to make changes to the information described in the datasheets without notice.
