CFEASL4, CFEAPSU - emergency assist alarm 4 way splitter and PSU

The 4 way splitter unit allows up to 4 stand alone disabled toilets to be monitored in one specific area.

Staff can then, at the designated area such as a reception or security desk, react to an alarm swiftly and efficiently.

The emergency assist power supply unit (PSU) is designed to power the 4 way splitter.

When using the 4 way splitter each disabled toilet does not need its own PSU as each toilet is powered by the 4 way splitter.

The VoCALL emergency assist alarm kit can be used with the 4 way splitter. The individual components of the VoCALL emergency assist alarm kit can also be purchased separately

Features and benefits

- Designed to comply with all regulations and recommendations
- High visibility
- Small compact design
- Local panel acknowledge call button
- Up to 4 disabled toilets monitored in one area
- Uses blue LEDs to avoid confusion
- Visibility to remote staffed areas
- No mains or PSU required at each disabled toilet using the 4 way splitter

Technical specification

Code	CFEASL4
Description	4 Way Splitter Unit
Specification	
Output	Volt free relay
Physical	
Construction	PC
Dimensions (mm)	H 86 x W 146 x D 39

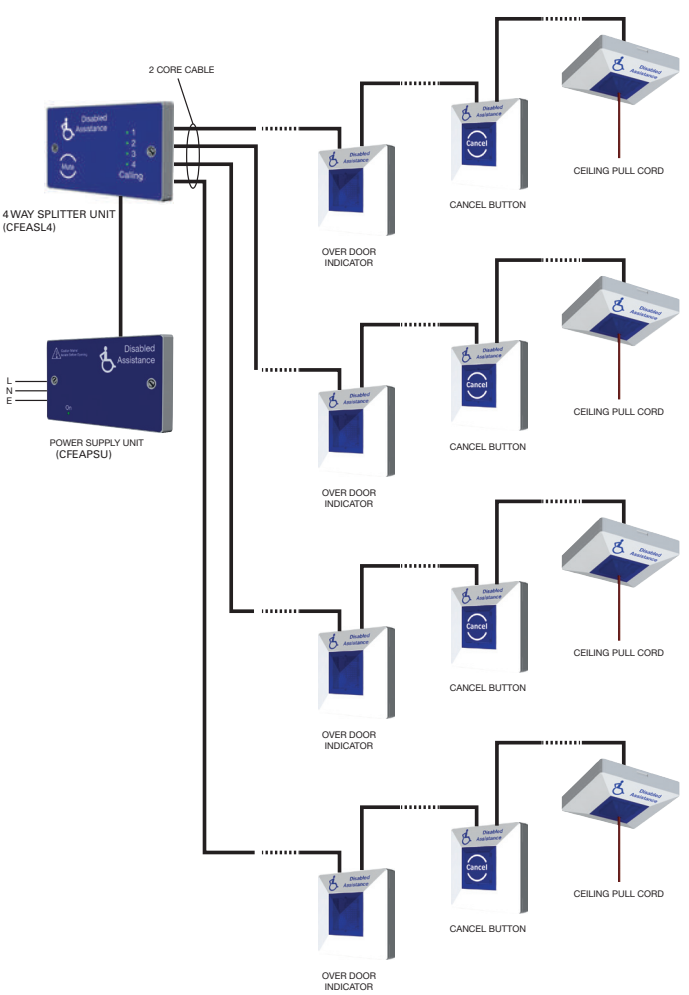

Code	CFEAPSU
Description	Power Supply Unit
Specification	
Mains	230V ac +10% -15%
Output	12V dc (nominal)
Battery (optional)	YUASA NP 0.8Ah/12V
Physical	
Construction	PC
Dimensions (mm)	H 86 x W 146 x D 39

Wiring

The mains powered supply must be wired by a qualified person in accordance with the latest revision on the IEE wiring regulations (currently 17th Edition), and connected to the building mains supply using a fused spur (fitted with a 3A fuse).

All mains wiring should be provided in accordance with the current edition of the IEE Wiring Regs (BS 7671) or in accordance with the relevant national wiring rules.

Always segregate Extra Low Voltage (ELV) wiring from the mains wiring. System requires minimum 2 core 0.4mm^2 cable. All wall-mounting devices should be mounted onto a back box of the required depth.
