Type 1045 Pressure Switches

Bürkert is well known for an extensive range of Solenoid and Control Valves as well as various instruments. To complete the range of sensors for easy on-off pressure control Burkert can provide a small and low-cost pressure switch with normally open or closed contact or even a changeover function. Models are available to handle up to 85°C and 100bar (Switch range 1 to 10bar).

Typical applications air, hydraulic oil, oil emulsions and water.
