CABLOK Series
Adjustable cable lockouts

The CABLOK series has been designed for locking off multiple breakers, switches and valves to prevent re-energisation of circuits and systems during maintenance as part of a safe isolation procedure. The flexible multi-stranded steel cable with PVC sheath is easy to thread and can be adjusted to the required length before locking off with a simple squeeze action. The ergonomic designed has a built-in hasp with space for up to six padlocks for when there are multiple operators working on the same system. The CABLOK Series is available with 1m, 3m and 5m cable lengths.
