

IP66 1g Enclosure

Description

WeatherPro has been designed to withstand the toughest outdoor and demanding environments, combining reliability and long-lasting performance with a sleek black finish. Rated IP66 and manufactured from impact-resistant polycarbonate ensures the product endures harsh conditions, making it an ideal solution for gardens, patios, and workshops.

Front mounted accessory frame provides universal compatibility with standard sized 1 gang accessories from other manufacturers. Allows easy access with a single latching clip to open the hinged cover which maintains the IP66 rating when closed. Neon indicator can be seen through the translucent cover to show status without the need to open the cover. To restrict unauthorised access, the cover can be locked and secured with a padlock.

Installation is quick and effortless. Fast-fix captive screws allow the detachable back box to be removed with ease, while mounting points are separated from the main wiring space minimising the need for weatherproof sealant to reinstate IP66 rating.

Features
