Alerting when life depends on it

Powering Business Worldwide

Eaton and Cooper united.

Energizing a world that demands more.

We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2013 sales of $22 billion, Eaton has approximately 100,000 employees around the world and sells products in more than 175 countries.

EATON

Powering Business Worldwide

Innovation that leads the World

From globally certified fire alarm sounders, beacons and sounder beacons to robust industrial signaling products, Eaton's Fulleon product line provides solutions to protect life and property for commercial and industrial applications.

Fulleon products have a reputation for constancy and reliability, and are the first choice for many companies looking for quality, compliance and risk free installation.

Expertise built on experience

The Fulleon product line is managed out of our UK facility in South Wales. All major functions are based on the one site including Design, Engineering, Manufacturing and Customer Services, ensuring a quick resolution to any questions you may have in regard to the status of your product or order.

Sounders for all applications

The Fulleon sounder portfolio is suitable for a wide variety of applications. The range includes the market leading RoLP sounder and the ultra low current Symphoni range, through to industrial sounders and bells.

All sounders are designed for easy installation and to fit with the majority of system applications.

Sounders

RoLP

The Roshni Low Profile (RoLP) is the fire alarm markets leading conventional sounder, although it finds uses in many applications, such as security, general signalling and process alarms.

With its recognisable body, wide operating voltage and international reputation for quality, the RoLP is a flexible sounder suitable for use in most applications.

Features

- 102dB(A) sound output
- 32 tones (user selectable)
- Two stage alarm
- Automatic synchronisation

Benefits

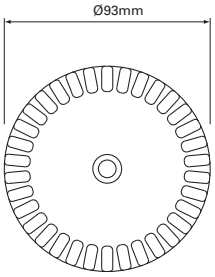

- Ideal for general signalling and Fire use
- Fire approved and general signalling tone options
- Alert and alarm function
- Improved tone clarity, reducing confusion

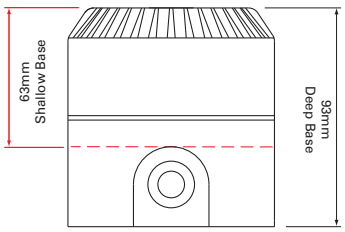

Technical Specification

Voltage	9-15Vdc 18-28Vdc
Current	12mA (Typical Tone 3)
Sound Output	102dB(A) (Typical Tone 3)
Tones	32
Volume	Control 10dB
Monitoring	Reverse polarity
Temperature	- 25°C to + 70°C
Protection	IP54 (s)* IP65 (d)*
Construction	ABS
Weight	0.25Kg
Colours	Red or white

The RoLP Maxi is a higher output version of the well known market leading RoLP sounder. The adoption of new smart technology has allowed six key alarm tones to achieve 106dB(A), providing a more powerful fire sounder for increased recognition in louder environments.

Features

- 106dB(A) sound output
- 32 tones (user selectable)
- Two stage alarm
- Automatic synchronisation

Benefits

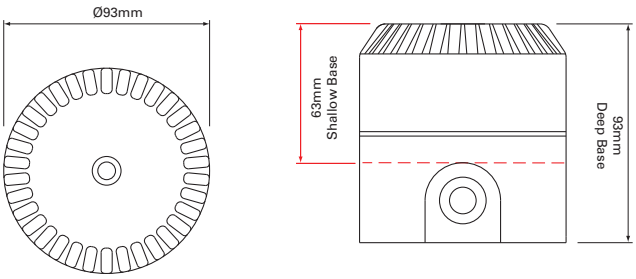

- Ideal for high ambient noise areas
- Fire approved and general signalling tone options
- Alert and alarm function
- Improved tone clarity, reducing confusion

Technical Specification

Voltage	9-15Vdc 18-28Vdc
Current	40mA (Typical Tone 3)

Sounders

CS200

The CS 200 is an entry level sounder suitable for fire, security or general signalling applications. The clip-fit base allows for a number of wiring options and enables simple installation.

Features

- 32 tones (user selectable)
- 12V or 24V option
- Secure clip fit base
- Volume control

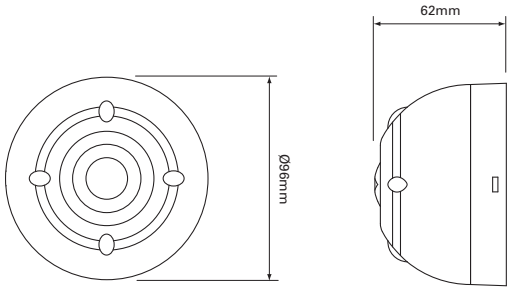

Benefits

- Fire approved and general signalling tone options
- For fire and security use
- Quick fitting for easy installation
- Reduce the sound output by 10dB

Technical Specification

Voltage	18-28Vdc
Current	13mA (Typical Tone 3)
Sound Output	100dB(A) (Typical Tone 3)
Tones	32

VdS

The Askari Compact is a discrete sounder for flush or surface fixing. The innovative design provides an excellent combination of high sound output and attractive aesthetics, ideal for retail, hotel and residential applications.

Features

- 32 tones (user selectable)
- Automatic synchronisation
- Two stage alarm
- Discrete design

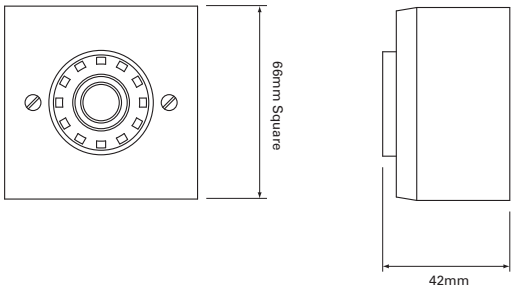

Benefits

- 6 tones certified for fire use
- Improved tone clarity, reducing confusion
- Alert and alarm function
- Can be flush or surface fixed

Technical Specification

Voltage	9-15Vdc 18-28Vdc
Current	18 mA (Typical Tone 3)

Sounders

Symphoni

The Symphoni is an extremely efficient wall sounder well suited for large installations where ultra-low current is critical. There is a standard version, providing UK alarm tones and an "E" version that has tones including the German DIN tone and the Netherlands Slow Whoop.

An IP66 rated WP version is also available.

Features

- Low 5mA current consumption
- 100dB(A)
- Automatic synchronisation
- Weatherproof option

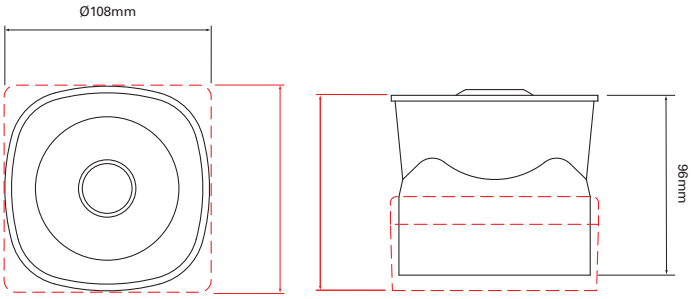

Benefits

- Maximises the number of devices on a system
- Certified for Fire use
- Improved tone clarity, reducing confusion
- Suitable for outdoor use

Technical Specification

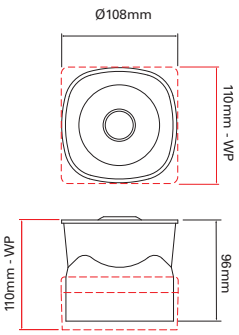

Voltage	18 - 30Vdc
Current	5mA
Sound Output	100dB(A)

Compact design delivering up to 120dB the Symphoni High Output provides an ideal solution to your signalling challenges. Producing levels of up to 120dB(A) this sounder can be used in open areas or in situations having higher than normal background noise levels. Despite its high output the unit is efficient and offers relatively low current consumption.

An IP66 rated WP version is also available.

Features

- High output up to 120dB(A)
- Two stage alarm
- 32 tones (user selectable)
- Weatherproof option

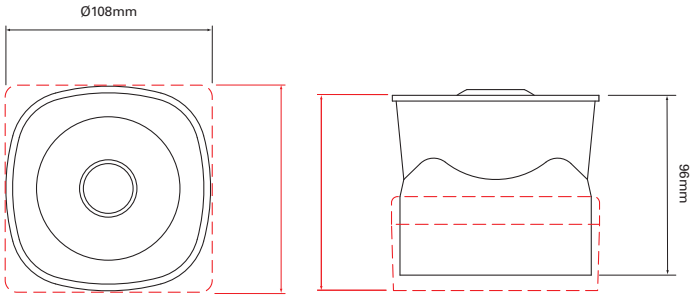

Benefits

- Ideal for high noise environments
- Alert and alarm function
- 6 tones certified for fire use

Sounders

Symphoni Voice +

The Symphoni Voice+ is an ultra-low current sounder that can be supplied with up to 16 voice messages. Normally the unit is loaded with 3 commonly used messages. The sounder also has international tones available and a user selectable setting so that messages can be played without the use of a tone.

Features

- Up to 16 messages
- 7 user selectable tones
- Bespoke message creation
- Low 4mA current consumption

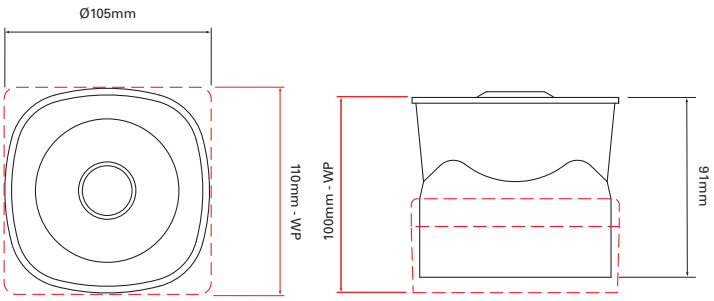

Benefits

- Fire, alert and general warning messages available
- Easy to configure at installation
- Any message, in any language
- Maximises the number of units on a circuit

Technical Specification

Voltage	9 - 60Vdc
Current	4mA Low 8mA High
Sound Output	100dB(A) Typical
Tones	7 user selectable + no tone option
Volume Control	10dB

The third generation Squashni G3 amalgamates the best features from the previous Squashni and Squashni Micro versions. The large flat surface allows the mounting of a large range of European detectors, while the high efficiency and low operating current permit compatibility with many systems.

Features

- Universal detector platform
- First fix base
- Low current consumption
- Tamper proof cap option

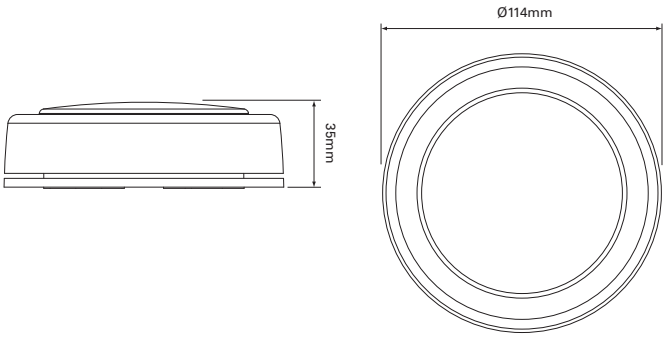

Benefits

- Fits the majority of detectors for increased flexibility
- Speeds up installation
- Maximises the number of devices on a system
- For use without a detector

Sounders

Asserta Maxi

The 120dB (A) IP66 rated Asserta warning sounder is designed to cope with harsh environments where robustness is required for extra protection. Design features are incorporated to ensure safe and easy installation, while providing flexibility with fewer product variants.

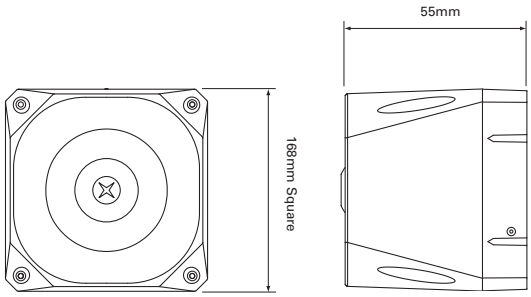

Features

- Powerful 120dB(A) output
- 3 stage alarm and time out function
- 42 alarm tones
- Robust design with IP66 protection

Benefits

- Maximum sound output for high noise environments
- 3 levels of alarm for differing warning states
- Large range of tone options
- For demanding environments in non-hazardous areas

Dimensions

Technical Specification

Innovation through optical and LED technology

The market for Beacons is changing, within Europe the introduction of EN54-23 has required the development of a new range of powerful beacons able to deliver a higher light output to a given area of coverage. The Fulleon LX range is approved to the new standard and through its patented optics and innovative electronics, delivers a market leading current consumption of 10mA.

For areas outside Europe and for indication purposes within, the Solista Maxi and the Solex Xenon offer a tried and tested solution based on over 30 years of experience in beacon design.

Eaton has a wide range of resources to aid the adoption of EN 54-23. Visit the LX Range Resources section on **www.cooperfulleon.com** for further information.

Solista LX Wall

The Solista LX Wall is suitable for a variety of applications, available in a red or white body and compatible with the full range of 6 bases.

A patented lens design distributes light to achieve the required illumination specified by EN 54-23, whilst using minimum current consumption.

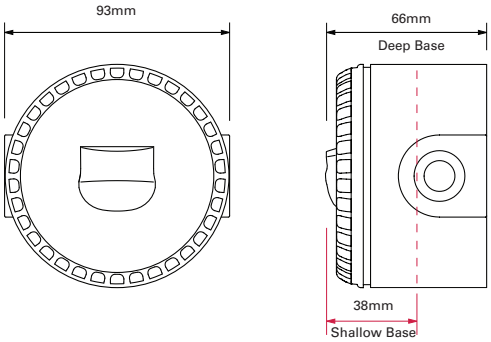

Features

- Ultra low current consumption of 10mA
- Up to 7.5m room coverage
- 0.5Hz or 1Hz flash rate
- Coverage switch to 2.5m

Benefits

- Use where current consumption is a key consideration
- Ideal for bedrooms, bathrooms and toilets
- Switch flash rate to 0.5Hz to reduce current consumption
- Reduces power consumption by up to 50%

VdS CERTIFIED TO EN54-23

The Solista LX Ceiling has a unique lens design that distributes the light in a cylindrical shape to achieve the required illumination specified by EN 54-23. Designed for installation at a height of up to 3m and with a discrete appearance, the device is ideal for a variety of applications, including bedrooms, bathrooms and toilets.

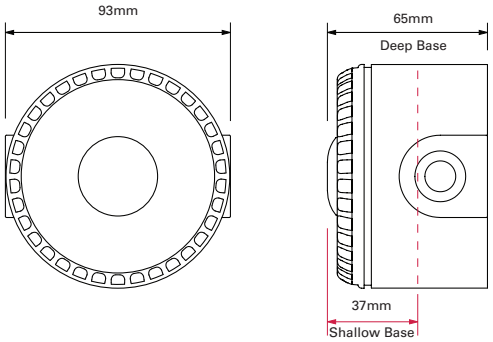

Features

- Ultra low current consumption of 10mA
- Up to 7.5m coverage volume
- 0.5Hz or 1Hz Flash rate
- Coverage switch to 3m

Benefits

- Use where current consumption is a key consideration
- Ideal for bedrooms, bathrooms and toilets

VdS CERTIFIED TO EN54-23

Beacons

Solista Maxi

The Solista Maxi is an attractive LED beacon that allows the user the choice between economy and performance. In the economy modes the Solista Maxi performs extremely efficiently requiring as little as 3mA, but it can be switched to attain a much higher light output where visibility is the prime objective. Even greater effectiveness can be achieved by selecting a double flash sequence.

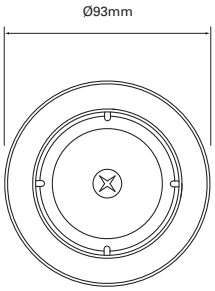

Features

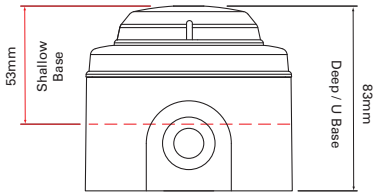

- Ultra low current consumption
- LED technology
- Long service life
- Compact size

Benefits

- Use where current consumption is a key consideration
- Ensures high efficiency and longer life
- Reduces the replacement costs
- Discrete option where building design is a priority

Due to its wide operating voltage and automatic synchronisation, the Solex beacon is a flexible solution for all types of alarm and monitoring systems.

Powered by Xenon technology, the Solex is a cost effective solution that can compliment audible alarms in high-noise environments.

Features

- 3 light output options
- 5 lens colour options
- 9-60V
- Tamper switch option

Benefits

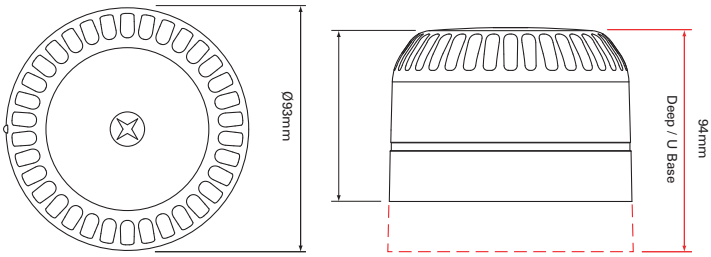

- Manage the current to suit your application
- Use for fire warning or general signalling
- Wide operating voltage for maximum flexibility
- For use where security is an issue (tamper switch)

Audible and visual signalling for Fire and Emergency Signalling

The combination of sound and light has been shown to improve awareness of an alarm by building occupants. The range of integrated sounder beacons from Eaton is suitable for a wide variety of applications and includes the new LX range, which was developed specifically to meet the new European beacon standard for fire alarms EN 54-23. The LX Range sounder beacons are based on the popular Rolp and Symphoni product platforms, providing reassuring quality and proven performance.

Innovation can be found with the Squashni LX base, designed to fit with most smoke detectors, it offers a light output that matches the footprint of a heat or smoke detector, reducing the number of devices requires, keeping costs down. For outside the E.U and for notification within, traditional sounder beacon solutions can be found within the Flashni range and for harsh environments, the Asserta, offering IP66 protection and a robust construction, making it suitable for safe area industrial applications.

Eaton has a wide range of resources to aid the adoption of EN 54-23. Visit the LX Range Resources section on **www.cooperfulleon.com** for further information.

RoLP LX Wall

The RoLP LX Wall is ideal for dual use applications where a visual alarm device is required in addition to an audible alarm.

Based on the popular Roshni product platform, the RoLP LX is a reliable, high performing VAD (Visual Alarm Device) that is certified to EN 54-23.

Recommended for wall use and requiring just one installation point, the RoLP LX Wall is also available as a base only for use with any standard RoLP sounder, including the high output RoLP Maxi sounder.

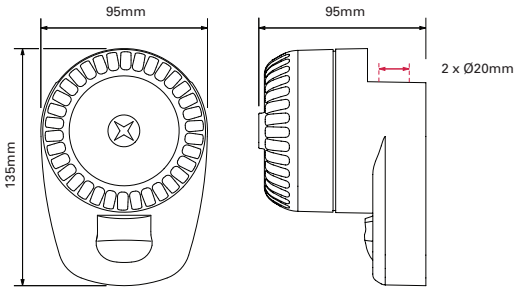

Features

- Ultra low current consumption
- RoLP and RoLP Maxi sounder options
- Up to 7.5m coverage volume (switchable to 2.5m)
- 0.5 or 1Hz flash rate

Benefits

- Use where current consumption is a key consideration
- Delivering up to 106dB(A) sound output
- Ideal for bedrooms, bathrooms and toilets
- Switch flash rate to 0.5Hz to reduce current consumption

VdS CERTIFIED TO EN54-23

The Symphoni LX Wall is a durable sounder beacon that is certified to EN 54-23. Boasting impressive performance and a durable design, it ensures reliability and energy efficiency. Its high sound output makes it suitable for open areas or where there is higher than normal background noise. There is a standard version, providing UK alarm tones and an "E" version that has tones including the German DIN tone and the Netherlands Slow Whoop.

The Symphoni LX is also available as a 'base-only' variant, meaning existing Symphoni sounders can be retro-fitted into an EN 54-23 approved base.

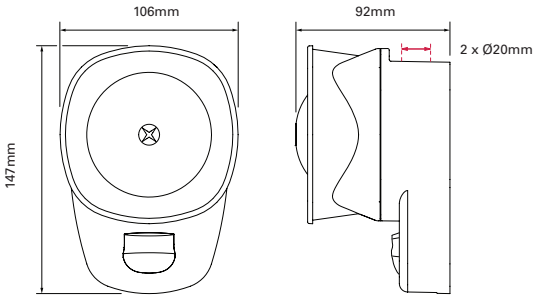

Features

- Ultra low current consumption
- Up to 7.5m coverage volume (switchable to 2.5m)
- 0.5 or 1Hz Flash rate
- Coverage switch to 2.5m

Benefits

- Use where current consumption is a key consideration
- Ideal for bedrooms, bathrooms and toilets
- Switch flash rate to 0.5Hz to reduce current consumption
- Reduces power consumption by up to 50%

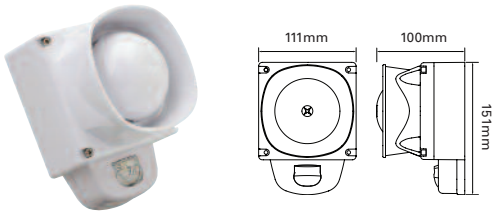

Dimensions

Technical Specification

Mounting	Wall
Voltage	18 - 28VDC (Fire Use)
Current	15 - 30mA dependent on setting (Sounder; tone 29)
Coverage (y)	7.5m (Switchable to 2.5m)
Mounting Height (x)	2.4m (max)
Coverage Volume Code	W-2.4-7.5
Coverage Volume	135 m^3 (15m^3)
Flash Rate	1Hz (Switchable to 0.5Hz)
Operating Temperature	-10°C to +55°C, -25°C to +70°C (WP)
Monitoring	Reverse Polarity
Protection	IP21C, IP66 (WP)
Weight	200g
Body Colour	White or Red
Flash Colour	White or Red
Sound Output	100dB(A) (Typical tone 29 - Symphoni)

VdS CERTIFIED TO EN54-23

Sounder Beacons

Squashni LX Base

The unique Squashni LX Base ceiling device refracts light around a smoke or heat detector to provide the required illumination demanded by EN 54-23.

Delivering a coverage volume radius of 15m, and a square area of 10.6m, the product is designed in line with the spacing specifications for both smoke and heat detectors.

The Squahsni's universal fitting means almost all detectors can be incorporated directly into the unit.

Approval pending

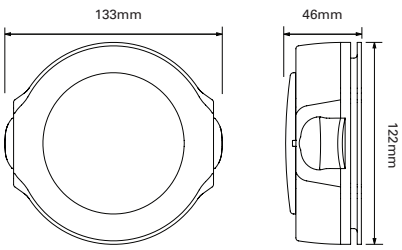

Features

- Up to 15m coverage
- Can be fitted with any standard detector
- LED technology
- White Flash

Benefits

- Ideal for large public areas
- Saves on installation costs
- Flash Rate Switch improves energy efficiency
- Flexibility in system design

See website for more information		

The Firecat is an extremely flexible fire sensor for use with security or other systems operating at 12Vdc. The unit can be configured to operate either as an optical, optical-heat, rate of rise heat or fixed temperature heat sensor via selection switches at the rear. The sensor's output is via a relay with volt free contacts, which can be set to latch or auto-reset from the alarm condition. The sensor is also self monitoring so that in the event of a chamber failure or reaching the limit of its contamination compensating facility the LED will illuminate continuously yellow.

Features

- Multi-Function 12V fire sensor
- Compensates for chamber contamination
- User selectable sensing functions
- Base lock function
- Latching or auto resetting alarm relay
- Multifunctional LED indicator

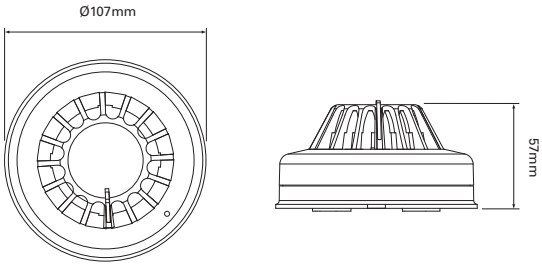

Benefits

- Flexibility in mounting positions
- Modern design
- Meets majority of needs
- Release button and protection circuit
- Completed with damping keeper plate

Technical Specification

Sounder Beacons

SQG3 AV

The SQG3 AV is a combined audible and visual base unit. The large flast surface allows the mounting of most popular European detectors, while the high efficiency and low operating current permit compatibility with many systems.

Features

- Fixing platform for most popular detectors
- Low current consumption
- Tamper proof cap for standalone use (supplied separately)
- First fix base for easier installation
- LED triggered option available

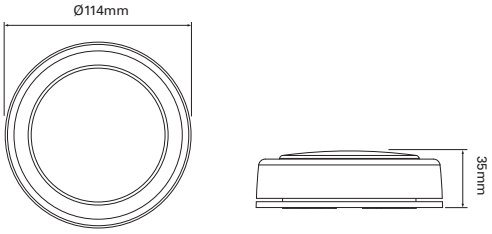

Benefits

- Save on installation costs
- Notification and detection in one unit

The Flashni is an audible and visual device which requires one single installation point. This greatly reduces installation costs and is less obtrusive than two separate devices. Versions are available with the sounder and beacon linked, or with separate terminals for independent operation.

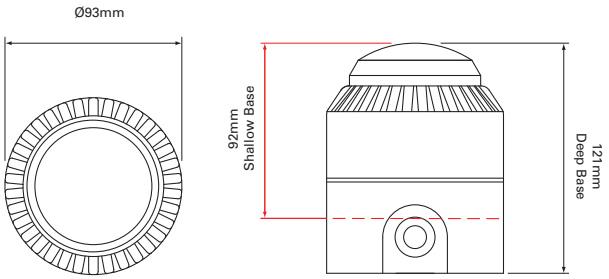

Features

- High output sounder beacon
- 12V, 24V and mains module option
- Choice of lens colour options
- Automatic sounder synchronisation

Benefits

- Up to 103dB(A) with built in Xenon flash
- Suitable for a variety of application
- Improved tone clarity, reducing confusion

Sounder Beacons

Asserta Sounder Beacon

The 120dB (A) Asserta Industrial warning sounder beacon is designed to cope with harsh environments requiring protection to IP66. Design features are incorporated to ensure safe and easy installation, while providing flexibility with fewer product variants.

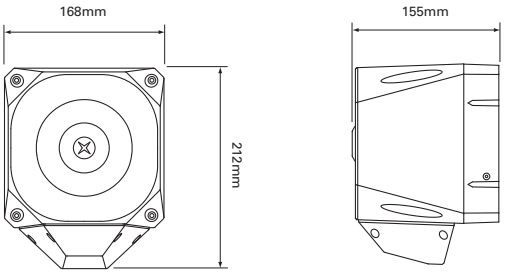

Features

- Powerful 120dB(A) output
- 3 stage alarm and time out function
- 42 alarm tones
- Asymmetric beacon

Benefits

- Maximum sound output for high noise environments
- 3 levels of alarm for differing warning states
- Large range of tone options
- Efficient use of light reduces current input generating the same light output as a 5j beacon

Reliability when it matters most

Eaton's Fulleon business provides a range of manual call points designed to meet the needs of a diverse range of applications. The units incorporate features such as clip on covers and a light guide (LED) for improved visibility and user reassurance. A broad spectrum of accessories allows for a variety of wiring practices, while a number of colour variants cater for both fire and other safety related applications.

Call Points

CXL

The CXL Universal Call Point combines a number of features into one package, simplifying selection and reducing stock variants.

The CXL comes as standard with a plastic and glass element, and its integral LED indicators provides increased flexibility for diverse applications.

Features

- Choice of glass or plastic elements
- Changeover contacts
- Potted waterproof option
- Flag on re-settable element

Benefits

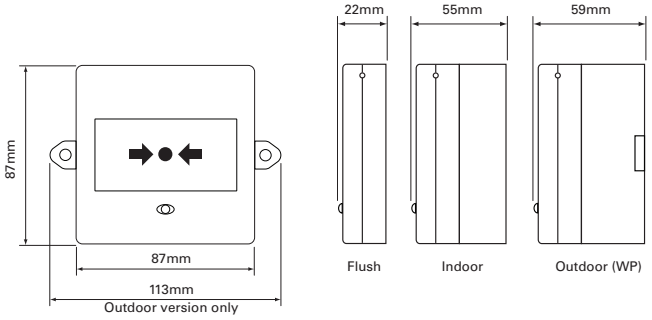

- Select element depending on location and user preference
- Wide range of usages
- Suitable for outdoor use
- Quick, visable alarm identification

Technical Specification

Voltage	Up to 30Vdc
Resistors	470 / 680

Familiar and recognisable notification tones

Bells are the oldest of alarm warnings and are still the fire signal of choice in many markets. Although not providing the flexibility of electronic sounders, bells produce a unique sound that is quite distinctive and unlikely to be confused with any other alarm. Available in two styles, two colours and variable voltage, they are a cost effective and reliable solution.

42 FB Bell

43 CF Bell

Bells

FB Bell

A unique, patented alarm bell designed for use in fire, security and other signalling systems. The combination of a miniature solenoid with an integrated control circuit allows excellent sound coverage, minimum current consumption and increased reliability. The improved aesthetics make the bell suitable for all applications including the most prestigious locations.

Features

- Modern design
- Simple instalation
- Weatherproof kit option
- High sound output

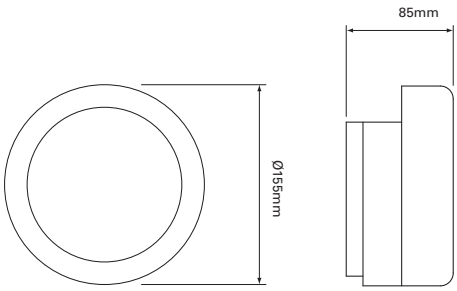

Benefits

- Suitable for all locations
- Easy to fit
- Provides protection up to IP33C
- Delivers up to 95dB(A)

Simple, effective indication

Remote indicators provide local feedback to building occupants that an action is required. The range has various options, including visual, audible, and colour indication options, offering flexibility and helping to get the right message across without unduly alarming or creating a disturbance where noise levels are a key consideration.

46 LED & LED Buzzer

47 Optical and Optical-acoustic repeaters

Indicators LED & LED Buzzer

LED & LED Buzzer

The versatility of this compact unit allows it to be used with the majority of detectors to provide convenient remote indication.

Available as a simple high brightness LED or with an integral buzzer, this indicator has many uses in applications where aesthetics is a key consideration.

Features

- Slim-line design
- Wide operating voltage
- Low current
- Integral buzzer option

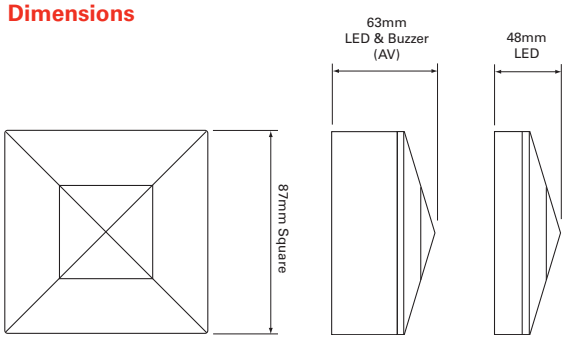

Benefits

- Unobtrusive, blends in with modern building design
- Suitable for a wide range of applications
- Maximises the number of units in a circuit
- Ideal when both and audible and visual indicator is required

High visibility LED's are ideal for notification purposes. The compact size and low current draw of the optical and optical acoustic repeaters makes them ideal for the signalling of alarms and anomalies. They are commonly installed in joint use with a detection unit in false ceilings and floating floors.

Available with a wide variety of LED colour variants and with an internal buzzer option, the optical repeaters offer clear visual indication suitable for a range of applications.

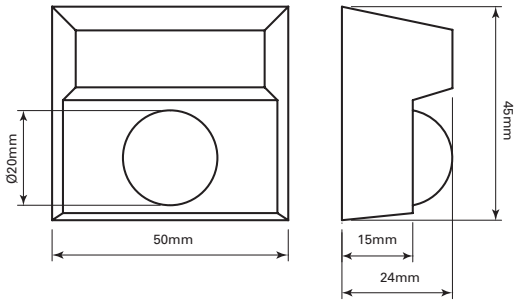

Features

- Compact size
- High visibility red, green and yellow LED
- Power supply at 12 and 24 Vcc
- Optical-acoustic versions (with Buzzer)

Benefits

- Quick, simple installation
- Visual and audible notification
- Discreet design
- Wide light diffusion
- Simple bi-adhesive fixing

WALES RALLY

Flexible power and installation configurations

A selection of bases and power supply units for the Fulleon fire notification range. The base range is designed to fit with the Rolp, Solista, Flashni and Solex product family.

Designed to offer flexibility and scalability for any size of installation the power supply units can be used to help drive the door release and sign boards range.

50 Bases

51 Switching Power Supply

52 Metal Box Power Supply

Bases & Power Supplies

Bases

The bayonet base has been designed to allow a common mounting for the Fulleon conventional alarm product range. The shallow base is suited to concealed wiring allowing installation with minimum visual impact. The deep and "U" bases cater for surface wiring of all types and provides ingress protection up to IP65.

The addition of 2 new low-profile base variants provide further options for installation in corners, or where the use of grommets or gaskets is preferred.

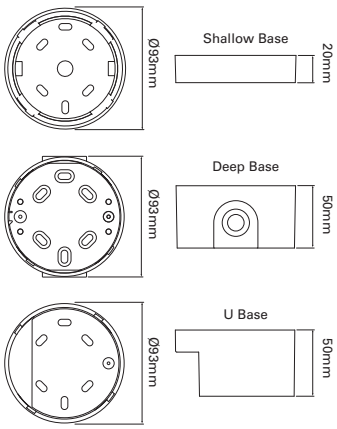

Features

- Design registered bayonet base
- Locking facility on all versions
- Protection up to IP65 on deep and U base
- Concealed wiring

Benefits

- Allows a common mounting for Fulleon's conventional alarm products
- Robust design
- External use in areas of high humidity
- Allowing installation with minimum impact

Specifically recommended as an auxiliary power supply unit for fire detection system components such as door retainers and notification devices, the highly efficient switching power supply has minimal heat loss.

The unit also provides excellent user feedback with 4 LED's that clearly indicate power supply status.

The switching power supply unit eliminates problems encountered with long cable runs. It also comes complete with a locking mechanism.

Features

- Switching technology
- High efficiency
- Small & large versions of metallic casing available
- Pb Battery Charging
- Available output current: 1,5 A, 2,5 A, 5A
- CPD Certified

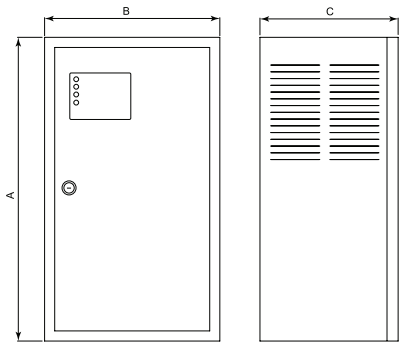

Benefits

- Simple installation
- Increases power management options with larger installations

Technical Specification

Housing material	Epoxy varnished sheet
Connection type	Terminals
Power supply	230 Vca -15+10%, 50÷60 Hz
Lines	Input mains, output battery, output load, open collector output for remote indications, general alarm outputs through clean relay contacts. Door opening detection.
Electrical protection	Fuses for mains and battery overload, Short circuit in output, battery inversion. Door opening tamper.
Operating Temperature	+5°C÷+40°C
Insulation Class	Class I
IP Degree	IP30
Standard equipment	Two keys per lock
Packaging	1 pc. / package

Bases & Power Supplies

Metal Box Power Supply

The highly efficient metal box power supply is available with variout output currents and is protected from overloads, polarity reversals and short circuits.

Recommended for systems that require small to medium size power supply units, the metal box power supply is ideal for use with panels, door retainers and fire notification devices.

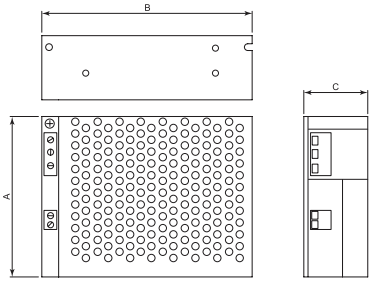

Features

- Switching technology
- Reduced size
- High efficiency
- Recharge for Pb batteries
- Available output current: 1,5 A, 2,5 A, 5A

Benefits

- Eliminates problems associated with long power cable runs
- Robust and purpose built
- Very high quality enclosure

the guardian

Maintaining the dynamic flow of personnel and protecting property

Vital to the safe operation of premises, there are many building thoroughfares fitted with fire doors that could cause inconvenience to the passage of people or goods. Magnetic door retainers provide a simple answer by keeping the doors open until a fire alarm (or other signal) causes the doors to close.

The Door Release range from Eaton provides a variety of options with different holding forces and mounting configurations to suit all types of doors found in commercial, education and healthcare premises.

Door Retainers

Series 13000

The Series 13000 is an electromagnetically operated fire door retainer approved to EN1155. It is designed to suit the needs of commercial fire doors, having a holding force of 50kg/490N and low current consumption. The Series 13000 is available with a floor mounting accessory.

Features

- Wall and floor mounting (with accessory)
- High holding force
- Low current consumption
- Release button and protection circuit
- Adjustable damping keeper plate
- Anti-residual release pin

Benefits

- Flexibility in mounting positions
- Suitable for large and small fire doors
- Requires less power from your system
- Door can be manually closed when not activated by the fire system
- Allows for door misalignment
- Efficient operation of your door retainer

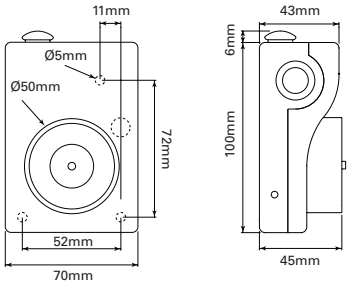

Technical Specification

Holding Force	50Kg / 490N
Voltage	24Vdc
Current	45mA
Mounting	Wall mounting / Floor bracket available
Housing Material	ABS
Temperature Range	10°C to +55°C
Protection	IP40
Weight	560g
Body Colour	White or Black

The compact and modern 1330/1340 range of electromagnetic fire door retainers is approved to EN1155.

A flexible solution for for the needs of most commercial fire applications, the range has a holding force of up to 100kg / 980N and uses minimal current. The range is fitted with a dual diode for protections against disturbance and polarity reversal.

Features

- Compact design
- High holding force
- Low current consumption
- Release button and protection circuit
- Adjustable damping keeper plate

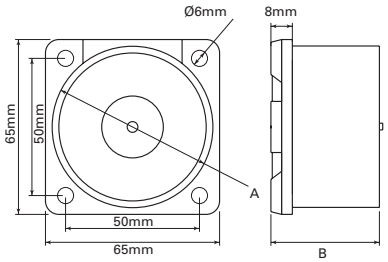

Benefits

- Discreet installation
- Suitable for large and small fire doors
- Requires less power from your system
- Door can be manually closed when not activated by the fire system
- Allows for door misalignment

Door Retainers

Series 1350 / 1360

The 1350/1360 series is a range wall mounted electromagnetic door retainers that offers the user a choice of holding strengths.

Robust and simple to install, they are ideal for a wide range of applications such as nursing homes, hospitals, schools and industrial premises. Doors can be held open under normal conditions and then automatically released in the event of a fire alarm activation.

Features

- Versatile holding settings
- High holding force
- Low current consumption
- Release button and protection circuit
- Adjustable damping keeper plate
- Protection diodes as standard

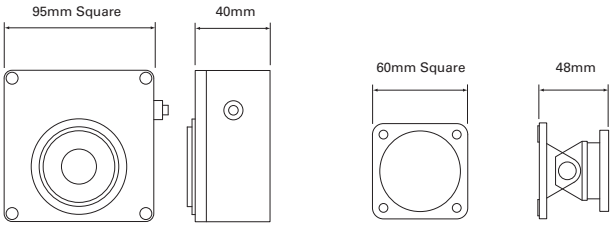

Benefits

- Flexibility in installation
- Suitable for large and small fire doors
- Requires less power from your system
- Door can be manually closed when not activated by the fire system
- Allows for door misalignment

Technical Specification

FSMD/024/40/W/DIODE	1350-CSA	Wall Mounted Magnetic Door Release 24Vdc, 40Kgf/390N (includes diode protection circuit)

Where wall mounted retainers are impractical a floor mount version can offer an alternative. The rugged cast frame of the 1369 series makes it immune to wear from everyday use in high traffic areas such as hospitals and nursing homes.
A manual release button is incorporated into the design and a spring ejector ensures that the door is promptly released.

Features

- Floor mounting
- High holding force
- Release button and protection circuit
- CPD certificate
- Protection diodes as standard

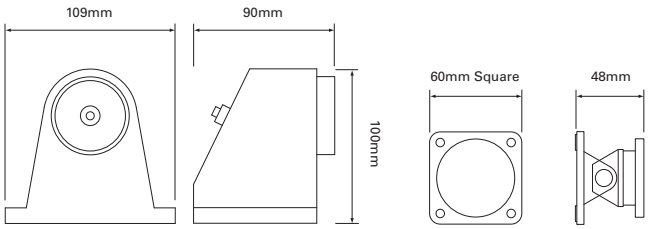

Benefits

- Flexibility in installation
- Suitable for large and small fire doors
- Door can be manually closed when not activated by the fire system

Door Retainers

Series 1370 / 1380

The 1370 and 1380 range of door retainers is an extremely flexible solution to help meet all of your greatest installation challenges.

Floor, wall or ceiling mounted variants ensures that the series is versatile, discreet and simple to install.

Features

- Floor, wall or ceiling mounting
- High holding force
- Release button and protection circuit
- Adjustable mounting height within 30 mm
- Protection diodes as standard

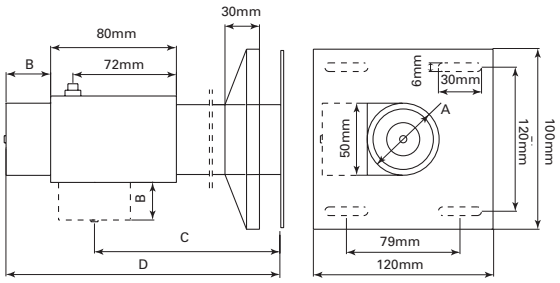

Benefits

- Flexibility in mounting positions
- Suitable for large and small fire doors

A clear indication to the status of an Emergency

In some markets the assurance of a sign board offers an additional level of protection to the building occupants.

A number of predefined messages are available. On request, other messages in any language to suit your market requirement are available. The sign boards can be illuminated, or with a buzzer, with the 5900 series complying with both EN 54-23 and EN 54-3.

64 Series 5000 - Thermoplastic

65 Series 5500

66 Series 5900

Signboards

Series 5000 - Thermoplastic

Providing Visual and Audible signalling, the 1500 series of sign boards is suitable for a diverse range of applications including fire, flooding and gas.

The LED technology provides high performance and energy efficiency ideal for industrial and commercial installations.

Various message options are available on page 67.

Features

- Unobtrusive aspect
- Wall mounting
- Visual and audible signalling
- Steady or blinking light

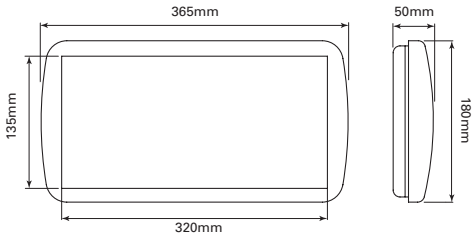

Benefits

- Wide range of applications
- Slim design
- Low consumption LEDs
- International pictograms

Exceder LED Strobes

The Wheelock® Exceder™ Series expands to include the industry's first LED notification appliances in one of the smallest, most compact single gang designs in the world. The patented technology provides the industry's lowest current draw. Ideal for Green Buildings, it incorporates a breakthrough optical design, resulting in best-in-class efficiency that provides material and system cost savings. Minimising current draw allows for a greater number of appliances on the NAC and fewer power supplies.

Features

- UL Approvals
- Wall mounting with switchable candela rating up to 110cd
- Energy efficient patented LED technology
- Fits standard US wiring accessories

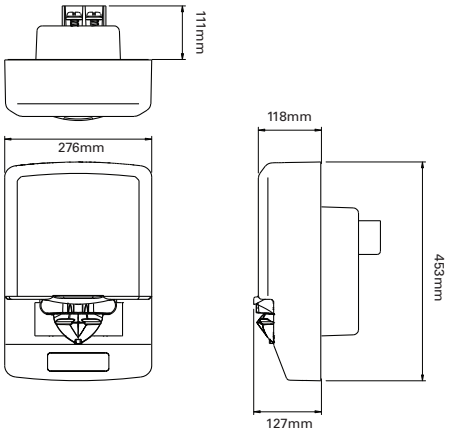

Benefits

- Can be used in all territories recognising UL standards
- Output can be matched to room size

UL & FM Approved

DSM Sync Module

The DSM Sync Module provide the facility to synchronise the strobe flashes and the Code 3 temperoral evacuation tones produced by the notification appliances. It also allow the sounders to be silenced while maintaining synchronised strobe operation, using only a two core cable.

Features

- UL/FM approved
- Used with Exceder or AS Audible/Strobes
- Meets NFPA-72 requirements for temporal pattern
- 3A per Circuit

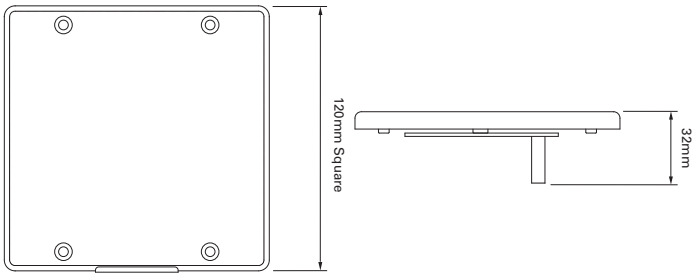

Benefits

- Can be used in all territories recognising UL standards
- Synchronises Aidle/Strobe operation to give unambiguous signals
- Meets NFPA guidance for the standard US Temporal alarm signal
- Capacity to operate many devices lowering installation costs

Technical Specification

Voltage	8 - 33Vdc
Current	3A per circuit (unit requires 40mA average)
Temperature	0°C to + 49°C
Protection	Internal use only
Weight	0.35Kg (0.75 lbs)
Colour	Red

DSM-12/24-R	CN126374	DSM Sync module

Wheelock Series MPS non-coded Manual Pull Stations are constructed of high quality, die-cast metal for long lasting performance and may be mounted on a single gang (US style) backbox. Available in either single or dual action configurations for indoor or outdoor use with SPST contacts and terminal strip connections.

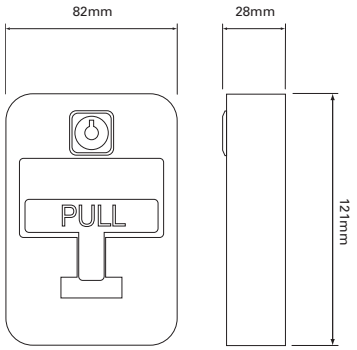

Features

- UL/FM approved
- Key reset
- Robust metal construction
- Fits standard single US box

Benefits

- Can be used in all territories recognising UL standards
- Prevents access by unauthorised persons
- Withstands use in busy public and commercial spaces
- Easy installation using Wheelock surface mounting boxes or flush standard US single gang accessories

Dimensions

Technical Specification

Voltage	16 - 33Vdc
Current	Normally open contact will close when the pull station is activated and is rated for 30 Vdc @ 1 amp and/or 120 Vac @ 1 amp.
Mounting	Wall
Back box	Single gang (4" x 2")
Configurations	Single or dual action
Temperature	0°C to + 49°C
Protection	Internal or external with NPS-WP backbox
Weight	0.35Kg (0.75 lbs)
Colour	Red, die-cast metal
Left	Mounting
Right	Single gang flush US box (4" x 2") Surface boxes MPS-ISB or MPS-WP

RoLP Marine	6	ROLP/SV/R/D MARINE	540503MED-0841X	RoLP, Red Deep Base, Marine
FLASHNI	31	FL/CL/R/S MARINE	640005MED-0312X	Flashni Sounder/Beacon, Clear Lens, Red Shallow Base. Marine
		FL/CL/R/D MARINE	640007MED-0311X	Flashni Sounder/Beacon, Clear Lens, Red Deep Base. Marine
		FL/RL/R/S MARINE	640001MED-0314X	Flashni Sounder/Beacon, Red Lens, Red Shallow Base. Marine
		FL/RL/R/D MARINE	640003MED-0313X	Flashni Sounder/Beacon, Red Lens, Red Deep Base. Marine
ASKARI COMPACT	9	AC/SV/R/S/BB MARINE	550068MED-0306X	Askari Compact Sounder, Red, Surface(BB), Tone Select Switch, Volume Control. Marine
SYMPHONI WP	25	SY/WP/R MARINE	654008MED-1032X	Symphoni Sounder Red / IP66 Version (WP). Marine
		SY/WP/W MARINE	654036MED-1033X	Symphoni Sounder White / IP66 Version (WP). Marine
SOLEX	21	SO/R/DR/10C MARINE	531924MED-1081	Solex Beacon, Red Lens, Red Deep Base, 10Cd. Marine
		SO/R/DR/15C MARINE	531028MED-1082	Solex Beacon, Red Lens, Red Deep Base, 15Cd. Marine
SOLISTA MAXI	20	SOLX/RF/RL/R/S MARINE	811021MED-0076	Solista Maxi, Red Lens, Red Flash, Red Shallow Base. Marine
		SOLX/RF/RL/R/D MARINE	811020MED-0077	Solista Maxi, Red Lens, Red Flash, Red Deep Base. Marine
CF BELL 6"	42	CFB6D24 MARINE	521601MED-9816X	6 Inch Motorised Bell 24Vdc, Red. Marine
FB BELL	43	FB/24/RED MARINE	502001MED-8015X	Electronic Solenoid Bell 24 Volts DC, Red. Marine
		FB/24/RED/WP MARINE	506001MED-8016X	Weatherproof Electronic Solenoid Bell 24 Volts DC Red. Marine

Part Numbers

Product name	Page	Product reference	Cat No	Description
MARINE (cont.)				
CXL	36	CXL/G/P/R/BB/470 + 680 MARINE	4920016MED-0476X	Conventional 470R/680R with LED and back box. Includes both glass and plastic resettable elements. Marine
		CXL/G/P/R/BB/470 + 680/WP MARINE	4990047MED-0477X	Conventional IP66 470R/680R with LED and back box. Includes both glass and plastic resettable elements. Marine
CXM	37	CXM/CO/GP/R/WP MARINE	4990073MED-0478X	For older systems - Conventional Red, Change over contacts up to 230Vac. Weatherproof back box included (Glass element provided)
ASSERTA SOUNDER	14	AS/S/24/R/110 MARINE	7011114MED-0223X	Asserta Sounder, 24v, Red Body, 110dB. Marine
		AS/S/24/R/120 MARINE	7011124MED-0224X	Asserta Sounder, 24v, Red Body, 120dB. Marine
ASSERTA SOUNDER BEACON	30	AS/SB/24/R/110/RL MARINE	7021111MED-0225X	Asserta Sounder/Beacon, 24v, Red Lens, 110dB, Red Body. Marine
		AS/SB/24/R/120/RL MARINE	7021121MED-0226X	Asserta Sounder/Beacon, 24v, Red Lens, 120dB, Red Body. Marine
ASSERTA MIDI SOUNDER	15	AS/M/S/9-60V/R MARINE	7041134MED-0220X	Asserta Midi Sounder, 9-60Vdc, Red Body. Marine
ASSERTA MIDI SOUNDER BEACON	31	AS/M/SB/9-60V/R/AL MARINE	7052114MED-0234X	Asserta Midi Sounder-Beacon, 9-60Vdc, Amber Lens, Red Body. Marine
		AS/M/SB/9-60V/R/CL MARINE	7052113MED-0221X	Asserta Midi Sounder-Beacon, 9-60Vdc, Clear Lens, Red Body, Marine
		AS/M/SB/9-60V/R/RL MARINE	7051111MED-0222X	Asserta Midi Sounder-Beacon, 9-60Vdc, Red Lens, Red Body. Marine
XPRESS				
SOLISTA LX WALL Shallow Base	18	SOL-LX-W/RF/R1/S	812013FULL-0114XE	Solista LX Wall Red body, Red flash, shallow base
SOLISTA LX WALL Deep Base	18	SOL-LX-W/RF/R1/D	812005FULL-0107XE	Solista LX Wall, Red body, Red flash, deep base
SOLISTA LX CEILING Shallow Base	19	SOL-LX-C/RF/W1/S	812022FULL-0123XE	Solista LX Ceiling, White Base, Red flash, shallow base
ROLP LX WALL	24	ROLP/R1/LX-W/RF	8500025FULL-0025XE	Rolp LX Wall, Red body, Red Flash
ROLP Red Shallow Base	6	ROLP/SV/R/S	540501FULL-0389XE	Rolp, Red body, shallow base
ROLP Red Deep Base	6	ROLP/SV/R/D	540503FULL-0403XE	Rolp, red body, Deep base
ROLP White Shallow Base	6	ROLP/SV/R/D	540502FULL-0406XE	Rolp, white body, shallow base
ASKARI COMPACT Red	9	AC/SV/R/S/BB	550068FULL-0142XE	Askari Compact, Red
ASKARI COMPACT White	9	AC/SV/W/S/BB	550072FULL-0216XE	Askari Compact White
SYMPHONI Red	10	SY/R	650001FULL-0003XE	Symphoni Sounder, Red
SQUASHNI G3	13	SQG3/SDR/W	666058FULL-0098XE	Squashni G3 Base Sounder, White
CXL CALL POINT (Indoor)	36	CXL/GP/470R+680R+LED/BB	4920016FULL-0018XE	CXL Call Point Indoor, Red
CXL CALL POINT (Outdoor)	36	CXL/GP/R/470R+ 680R+LED/WP	4990047FULL-0420XE	CXL Call Point, Outdoor, Red
CF BELL	42	CFB6D24RED	521601FULL-1601XE	CF Bell 6" Red
FB BELL	43	FB/24/R	502001FULL-2001XE	FB Bell 6" Red
CALL POINT SPARE GLASS	NOT SHOWN	CX SPARE GLASS Pk 10	516200FULL-5017E	Call Point glass for CX range 10 pack
CALL POINT SPARE KEY	NOT SHOWN	CX/UK PK OF 10 TEST KEYS	4990009FUL-0040E	Call Point Keys
LED REMOTE INDICATOR	46	REM/C/LEDINDICATOR	600111FUL-0000E	Led Remote indicator, Red Lens

Tones Table

1st Tone	2nd Tone	Type	Frequencies	Temporal Pattern		Typical Application
1	14	Alternating	800 & 970	2Hz (250ms-250ms)		BS Fire tone
2	14	Sweep	800 to 970	7Hz (7/s)		BS Fire tone
3	14	Sweep	800 to 970	1Hz (1/s)		BS Fire tone
4	14	Continuous	2850	Steady		General purpose
5	4	Sweep	2400 to 2850	7Hz		General purpose
6	4	Sweep	2400 to 2850	1Hz		General purpose
7	14	Slow whoop	500 to 1200	3.5s sweep, 0.5 s silence, then repeat		Dutch tone (NEN 2575)
8	14	Sweep	1200 to 500	1Hz		Din tone (33 404)
9	4	Alternating	2400 & 2850	2Hz (250ms-250ms)		General purpose
10	14	Intermittent	970	0.5Hz (1s On/1s Off)		PFEER alert
11	14	Alternating	800 & 970	1Hz (500ms-500ms)		BS Fire tone
12	4	Intermittent	2850	0.5Hz (1s On/1s Off)		General purpose
13	14	Intermittent	970	0.8Hz (250ms On/1s Off)		General purpose
14	14	Continuous	970	Steady		PFEER Toxic-gas
15	14	Alternating	554 & 440	100ms-400ms		French fire tone
16	16	Intermittent	660	3.3Hz (150ms On/150ms Off)		Swedish (Air raid)
17	17	Intermittent	660	0.28Hz(1.8s On/1.8s Off)		Swedish (Local warning)
18	18	Intermittent	660	0.05Hz (13s Off / 6.5Hz On)		Swedish (Pre-mess)
19	19	Continuous	660	Steady		Swedish (All clear)
20	20	Alternating	554 & 440	0.5Hz (1s On/1s Off)		Swedish (Turn out)
21	21	Intermittent	660	1Hz (500ms-500ms)		Swedish tone
22	14	Intermittent	2850	4Hz (150ms On/100ms Off)		Pelican crossing
23	14	Sweep	800 to 970	50Hz BS		Fire tone
24	4	Sweep	2400 to 2850	50Hz		General purpose
25	25	Intermittent	970	3 x 500ms pulses followed by 1.5s silence then repeat		ISO 8201 / Australia
26	26	Intermittent (1)	800 to 970	3 x 500ms pulsed sweep followed by 1.5s silence then repeat		ISO 8201 / Australia
27	27	Intermittent (1)	970 & 800	3 x 500ms pulsed two tone followed by 1.5s silence then repeat		ISO 8201 / Australia
28	10	Alternating	800 & 970	2Hz (250ms-250ms)		BS Fire tone
29	33	Alternating	990 & 650	2Hz (250ms-250ms) (Symphoni tones)		BS Fire tone
30	35	Alternating	510 & 610	2Hz (250ms-250ms) (Squashni Micro tones)		BS Fire tone
31	14	Sweep	300 to 1200	1Hz		General purpose
32	35	Alternating	510 & 610	1 Hz (500mS-500mS)		BS Fire tone
33	(1)	Continuous	990	Steady		BS Fire tone
34	(1)	Intermittent	990	1Hz (500ms On/500ms Off)		BS Fire tone
35	(1)	Continuous	510	Steady		BS Fire tone
36	(1)	Intermittent	510	1Hz (500ms On/500ms Off)		BS Fire tone
37	(1)	Continuous	850	Steady		BS Fire tone
38	(1)	Continuous	2650	Steady		General purpose
