Special features

ON-OFF
Metal
OFF
The circuit-breaker's ON/OFF buttons can be locked together by using the interlock. It is also possible to lock only the ON or the OFF button by using a padlock.
This means that it will no longer be possible to actuate the circuit-breaker locally.
If the OFF button is interlocked, it will be continuously actuated.
This means that it will not be possible to use remote switching if optional remote switching with an ON/OFF coil is being used.
M = Metal
