General Installation Notes

- Installation must be carried out in accordance with the latest codes and regulations by a qualified electrician.
- Ensure power is disconnected prior to installation or maintenance to avoid danger of electrical shock.
- Environmental exposure conditions during installation should be dry. Moist or wet conditions should be avoided.
- Avoid mounting the buzzer where it will be subjected to excessive vibration.
- To prevent the risk of electric shock, access to the power supply cables must be prevented either by fitting a suitable sleeve or by means of an insulating barrier.

Installation Instructions

Mount the Buzzer using the two M5 lugs located on the base of the Buzzer.

Once the Buzzer has been installed, make the necessary power connections as shown in the Cable Connections section below.

Cable Connections

1. For Continuous Tone

- Red – Positive
- Black – Negative
- Grey – N/A

2. For Pulsed Tone

- Red – Positive
- Black – Negative
- Grey – Connect to Negative to change output from Continuous Mode to Pulsed Mode.

Moflash Signalling Limited accepts no liability for any consequences following use of this document. Any technical specifications and products referred to within this document are subject to change without notice due to continual improvement and product development policies. All dB(A) figures are subject to environmental conditions. The units are sold under Moflash standard conditions of sale, available on request. Additional resources, including installation sheet translations, certificates and DoCs are available from the **www.moflash.co.uk** website**.**
