Technical Specifications

Miller® Kernmantel restraint lanyards

Description:

Restraint lanyards are used to restrict the worker's movement to prevent him reaching a location where a fall hazard exists.

Features and Benefits:

Material :
Kernmantel ∅11mm
Sheath: Polyester
Core: Polyamide

Lanyard :
Breaking strength of the rope : > 22 kN
EN 354
EN 358 : 1999
Temperature of use : -30°C à +50°C

- The Kernmantel rope is 2 times more resistant to the abrasion than the other standard ropes.

New design :

- The new kernmantel lanyards are manufactured with a light green rope with black stripes, which are highly visible from a distance increasing safety at work.
- The stitches are highly visible which facilitates the safety check before use.

A wide range of products for every worker's situation:

This new range of Miller kernmantel restraint lanyards offers a large choice ensuring there is an option for each work situation.

LAW of 19 MARCH 93

PPE are products classified in category III, mortal risks, and as such they have to be the object of a periodic inspection for less than twelve months at the time of its use by the qualified person.
