VGA to DVI and HDMI

VGA to BNC cables

These assemblies utilise the same tough over-moulded straight and male right angle connectors as the VGA cables listed above, but are manufactured with 5 precision 75 Ohm coaxial cables (4 in the case of the RGB & composite sync cable). A useful addition to the range is the 2 short breakout cables. VGA male to 5 x BNC female 0.15m is ideal for connecting VGA outputs to standard or low loss BNC cables for extended runs or high-resolution applications. The 0.3m breakout to male BNCs provides a convenient method of terminating VGA outputs to BNC bulkhead through connectors on interface panels.

Order code	Description
104-600-601	1M VGA to 5x BNC male
104-600-602	2M VGA to 5x BNC male
104-600-603	3M VGA to 5x BNC male
104-600-605	5M VGA to 5x BNC male
104-700-015	0.15M R/angle VGA to 5x BNC female
104-800-801	1M R/angle VGA to 5x BNC male
104-500-015	0.15M VGA to 5x BNC female
104-600-030	0.3m VGA to 5 x BNC male
