Cable Entries - Deep	Knockouts for 2 x 20mm Ø entries at 180° Single 20mm entry may be drilled at rear
Cable Entries - U"	For 2 adjacent 20mm entries Single 20mm entry may be drilled at rear

The bayonet base has been designed to allow a common mounting for most of Fulleon's conventional alarm products. The Shallow Base is suited to concealed wiring allowing installation with minimum visual impact. The deep and "U" bases cater for surface wiring of all types and provides ingress protection up to IP65. Combinations of two or more Deep bases form the basis of the AV Unit allowing for many permutations of audible and visual warning units.

- FULLEON'S DESIGN REGISTERED BAYONET BASE
- LOCKING FACILITY ON ALL VERSIONS
- PROTECTION UP TO IP65
- FR ABS MATERIAL
