Polyco® SIGMA

Taskmaster™

Handles tasks with ease

Taskmaster™ is a latex glove with a cotton interlock liner offering excellent grip, and good protection against a wide range of chemicals and cleaning agents. This natural rubber glove provides good mechanical protection, attaining maximum abrasion score as defined by European Standard EN388, resulting in a glove with excellent durability. It is anatomically shaped and tapered at the wrist for a more comfortable and ergonomic fit, and the liquid proof gauntlet provides additional protection to the lower arm. Handling ability is greatly enhanced by the roughened surface on the hand area increasing the level of grip in both wet and dry conditions. The soft cotton interlock liner provides good insulation against heat and cold, and absorbs perspiration keeping the hands comfortable. Taskmaster™ has been tested in accordance with EN1186 making it suitable for food contact. Also available on header card for display purposes and allowing for lower order quantities.

Typically used for:

- Cleaning & Janitorial
- Construction
- Local Authority Work
- Waste Management
- Laboratory Work
- Food Manufacturing & Preparation
- Chemical Manufacturing & Use

Case Quantity:

12 pair per polybag
48 pairs per case
