DuPont™ Kapton® B

Polyimide Film

Product Description

DuPont™ Kapton® B polyimide film exhibits an excellent balance of physical, chemical, and electrical properties over a wide temperature range, with superior dimensional stability at elevated temperatures.

DuPont™ Kapton® B is a black, homogeneous opaque film. The matte black color of Kapton® B provides a uniform, aesthetically pleasing appearance while maintaining key physical properties. The homogeneous pigmentation provides better color integrity against flexural cracking or abrasion in comparison to black coatings or dyes. These characteristics make it ideal for use in many industrial applications where opacity, low reflectivity, or aesthetics are required.

Applications

Black films for use in:

- Heaters, Antenna, LED circuitry and stiffeners requiring Black aesthetics
- Applications requiring laser ablation

Product Specifications

DuPont™ Kapton® B polyimide film is manufactured, slit and packaged according to the product specifications listed in EI-10167, General Specification Bulletin.
