

BE Flexible Single

Bakker Elkhuizen

Easy to install, adjust and with lifetime guarantee this is the best monitorarm we've ever made!

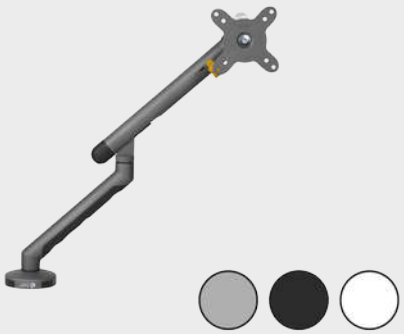

The monitor arm at its best

The BE Flexible is as a monitor arm should be, quick and very easy to install, equipped with the latest innovative technology and also made of 72% recycled material and is 100% recyclable! Everything you need for your ideal workplace.

Ergonomic background

Placing the screen too low can lead to tension in the upper neck. Placing it too high (the top should not be above eye level) can also lead to problems. Even more important is the adjustability of the depth, ensuring an optimal viewing distance. This allows you to better take in information and puts the least amount of strain on the eyes. This optimal screen position works better, more comfortably and increases productivity by 10% when compared to an incorrect positioning (Sommerich et al,1998).
