The Ejendals range of gloves for welding and hot work is distinguished by comfort, durability and excellent protection. The range includes gloves for TIG welding and gas welding in tough environments. It also contains chrome-free models. Our heat-resistant gloves can be used at working temperatures of up to 200°C and can even handle momentary peaks of up to 1,200°C.

TEGERA 130

Guaranteed top quality goatskin glove.
