APPLICATIONS

Blocfor 6 ESD 150 kg: fall arrester for securing people working at height or on terraces. It is equipped with the ESD (End System Dissipator) system.
This ESD system ensures that the user is protected against an impact of less than 600 daN, even if he or she falls when the cable is fully unwound. This reduces the severity of the impact on the user's body in the event of a fall. It effectively protects the cable from the risk of cuts when used horizontally.
