Amendments to standard IEC / EN 61010-031 : 2016-07

HIRSCHMANN® Test & Measurement
A BRAND OF SKS

The amendments according to standard mentioned above have to be implemented till July 2018. There are some products of our Hirschmann Test & Measurement range that are affected. We made constructional modifications to ensure current classification and we adjusted the rating data for few items. According data sheets are available from 3rd July 2018 on www.sks-kontakt.de.

Overview of product modifications

so far	from 3rd July 2018
CAT I	O (devices without a measurement category for other circuits that are not directly connected to mains)

article description	**KLEPS 1600 black/red**
article number	975106100/-101
product goup / system	clamp-type test probes, 2mm safety system
changing NEW	reclassification of measurement category from CAT III to **CAT II** (product marking was adjusted accordingly)

article description	**KLEPS 2600 black/red**
article number	972306100/-101
product goup / system	clamp-type test probes, 4mm safety system
changing NEW	reclassification of measurement category from CAT III to **CAT II** (product marking was adjusted accordingly)

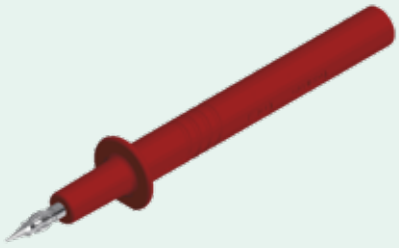

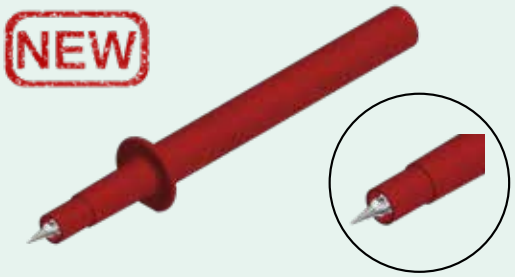

article description	**KLEPS 2700 black/red**
article number	972307100/-101
product group	clamp-type test probes
changing NEW	Adjustment of rating data AC/DC 1000 V to **30 VAC / 60 VDC** **So far: 4 mm safety system** **New: 4 mm standard system**
