Hot Glove™

Never too hot to handle when wearing the Hot Glove™

Hot Glove™ from Polyco is a heat resistant double layered cotton glove with nitrile grip coating.

Achieving level 2 for contact heat, it can withstand temperatures of 250°C providing a high level of protection against heat. The double layer of knitted cotton also offers a degree of comfort, flexibility and dexterity not normally associated with such protection levels. The glove has good tear resistance which enhances its mechanical protection and increases durability, and has a nitrile grip pattern for safer handling. It can be worn on either hand which extends the life of the glove, and is designed to have a generous fit to allow for quick and easy removal when required. Available in two lengths, for additional protection to the forearm.

Hot Glove 34cm

CE 0120 EN388 1232 EN407 02XXXX

Case Quantity
1 pair per polybag
12 pairs per case
