FAG

Maintenance products

FAG Top-Laser SMARTY2
FAG Top-Laser TRUMMY2

A strong double act –
for alignment and tensioning of belt drives

With new features !

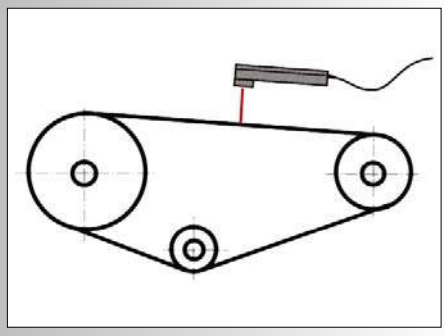

Achieving maximum performance and optimum service life from belt drives depends on correct alignment and optimum tensioning

SMARTY2 and TRUMMY2 are two precision instruments for

- prevention of bearing damage
- reduction of running noise
- saving energy and costs

SCHAEFFLER GROUP
INDUSTRIAL

Top-Laser TRUMMY2 and SMARTY2 are used in belt drives for:

- **ventilators**
- **fans**
- **conveying equipment**
- **pumps**
- **compressors**
- **etc.**

Advantages of Top-Laser TRUMMY2

- **Optimum measurement and setting of belt tension**
  - through display of all relevant parameters in frequency (Hz) or force (N)
- **Suitable for use at difficult to access locations**
  - by means of the sensor with cable included in delivery
- **New: simple handling**
  - through measurement with one hand

Advantages of Top-Laser SMARTY2

- **More precise than conventional alignment methods**
  - through easy-to-use laser beam adjustment
- **New: precise determination and documentation of machine alignment**
  - through option for digital display of adjustment values in real time

Further advantages

- Significant reduction in wear of drive components
- Longer runtime and higher reliability of machinery and plant
- Lower energy costs
- Higher cost-efficiency
- Simple handling and very user friendly
