ASST042-316

Rain hood, 400x210

A stainless steel rain hood provides shelter via a sloped roof and protects installed components from accumulated water dripping into the enclosure when the door is opened.

CHARACTERISTICS	
Width	400 mm
Depth	210 mm

Item no.: ASST042-316
EAN no.: 8713574113794

Technical data

Description: To be fitted as an outdoor shelter on stainless steel wall mounted enclosures. The roof is slightly sloped and has a drip strip. Machining is required. Dimensions of the enclosure will be increased by H: 60 mm, W: 20 mm and D: 20 mm.

Material: AISI 304 / AISI 316L pre-grained stainless steel.

Finish: 400 pre-grained stainless steel.

Pack quantity: 1 rain hood with mounting material.

Additional information: ASST is not compatible with 180° MMHS hinges.

Features

Feature: Stainless steel rain hood for stainless steel wall mounted enclosures

Advantage: The rain hood is mounted on top of the enclosure and provides shelter via a sloped roof. The rain hood features a drip strip that protects the enclosure's door gasket from the accumulation of water.

Benefit: The rain hood protects installed components from water as it removes the risk of accumulated water on top of the gasket, dripping into the enclosure when the door is opened.

Comment: Wall mounted enclosures require machining before the rain hood can be mounted. Rain hoods are not compatible with combined enclosures. The overall dimensions of the enclosure will increase by 60mm in height, 20mm in width and 20mm in depth.
