Specifications

Eaton 284769

Catalog Number: 284769

Eaton Moeller® series DILM Paralleling link, DILM80 to DILM150

General specifications

Product Name
Eaton Moeller® series DILM paralleling link

Catalog Number
284769

EAN
4015082847692

Product Length/Depth
102 mm

Product Height
76 mm

Product Width
83 mm

Product Weight
0.957 kg

Certifications
CSA File No.: 012528
UL
CSA-C22.2 No. 14-05
UL File No.: E29096
CSA Class No.: 3211-03
CE
CSA
UL 508
IEC/EN 60947-4-1
UL Category Control No.: NLDX

Catalog Notes
AC1 current carrying capacity of the open contactor increases by a factor of 2.5

Powering Business Worldwide

General

Accessory/spare part type

Connecting bridge

Product category

Accessories

Protection

Protected against accidental contact in accordance to VDE 0106 part 100

Climatic environmental conditions

Ambient operating temperature - min

-25 °C

Ambient operating temperature - max

60 °C

Terminal capacities

Terminal capacity

1 x (35 - 300) mm², stranded

2 x (35 - 120) mm², stranded

2 x (11 x 21 x 1) mm (Number of segments x width x thickness), Flat conductor

Screw size

5 mm AF, Hexagon socket-head spanner, Terminal screw, Main cables

Tightening torque

14 Nm, Screw terminal

Conventional thermal current Ith

Conventional thermal current ith of main contacts (1-pole, open)

400 A

Design verification

Equipment heat dissipation, current-dependent Pvid

37.8 W

Heat dissipation capacity Pdiss

0 W

Heat dissipation per pole, current-dependent Pvid

12.6 W

Rated operational current for specified heat dissipation (In)

400 A

Static heat dissipation, non-current-dependent Pvs

0 W

10.2.2 Corrosion resistance

Meets the product standard's requirements.

10.2.3.1 Verification of thermal stability of enclosures

Meets the product standard's requirements.

10.2.3.2 Verification of resistance of insulating materials to normal heat

Meets the product standard's requirements.

10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects

Meets the product standard's requirements.

10.2.4 Resistance to ultra-violet (UV) radiation

Meets the product standard's requirements.

10.2.5 Lifting

Does not apply, since the entire switchgear needs to be evaluated.

10.2.6 Mechanical impact

Does not apply, since the entire switchgear needs to be evaluated.

10.2.7 Inscriptions

Meets the product standard's requirements.

10.3 Degree of protection of assemblies

Does not apply, since the entire switchgear needs to be evaluated.

10.4 Clearances and creepage distances

Meets the product standard's requirements.

10.5 Protection against electric shock

Does not apply, since the entire switchgear needs to be evaluated.

10.6 Incorporation of switching devices and components

Does not apply, since the entire switchgear needs to be evaluated.

10.7 Internal electrical circuits and connections

Is the panel builder's responsibility.

10.8 Connections for external conductors

Is the panel builder's responsibility.

10.9.2 Power-frequency electric strength

Is the panel builder's responsibility.

10.9.3 Impulse withstand voltage

Is the panel builder's responsibility.

10.9.4 Testing of enclosures made of insulating material

Is the panel builder's responsibility.

10.10 Temperature rise

The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.

10.11 Short-circuit rating

Wiring diagrams

eaton-contactors-dilm-paralleling-link-wiring-diagram-002.eps

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

10.12 Electromagnetic compatibility

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

10.13 Mechanical function

The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.
