YORK ABRASIVES

DATA SHEET

Quick Change Disc - Type R - Aluminium Oxide - P10

Aluminum oxide is the most commonly used abrasive. Best-suited for general purpose deburring and blending, it is tough, economical and fracture resistant. Commonly used on ferrous alloys, high-tensile materials and wood.

Quick change screw fitting ensures that the disc is always perfectly centred without adhesive, moving parts or centre screw damage to the workpiece.

Features and Benefits

- Compatible with the 3M ROLOC™ system holders
- Higher speeds can be attained resulting in faster stock removal reduced man-hours and increased productivity
- Leaves a burr-free surface ready for painting or coating
- For cleaning, blending and finishing on all metals
- Used for the removal of light rust, oxides and coatings

Technical Specifications

- Diameter: 25mm
- Grit: P100
- Maximum operating speed: 25,000rpm
- Disc holder shank diameter: 6mm

Note.
Requires suitable disc holder sold separately.
