YORK GOLD ABRASIVES

DATA SHEET

230mm DPC Grinding Disk - Type 27 - Aluminium Oxide - A30S

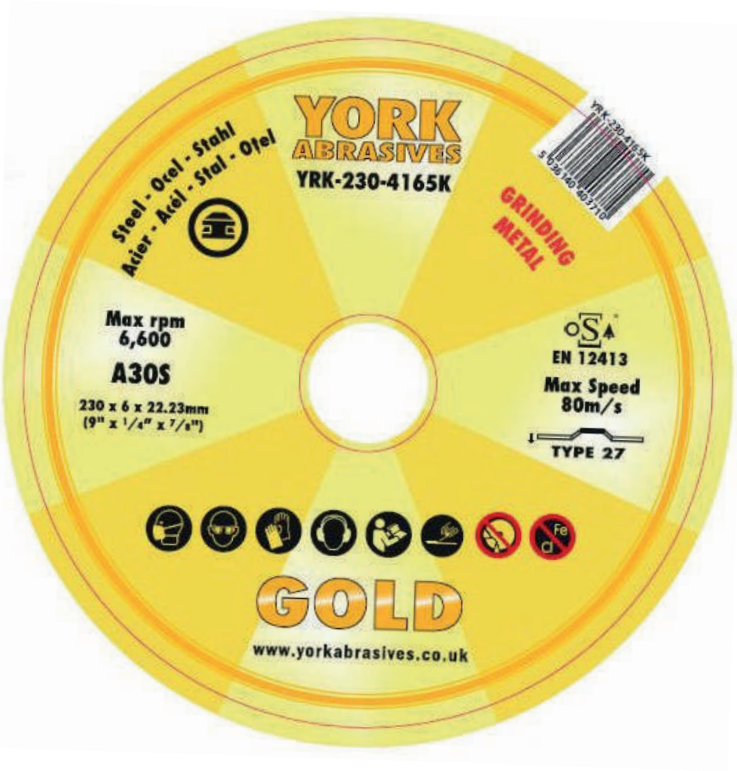

Designed specially for Inox cutting-off applications. Made up of sharp aluminium grains, these wheels offer longer life and higher material removal rates making them ideal for a number of industrial applications including Automotive, Foundry, Fabrication, Aerospace and Construction. Non-polluting of stainless Steels (Fe, S, Cl <0.1%) Iron, Sulphur and Chlorine content <0.1%.

Features and Benefits

- Recommended grinding angle: 25 to 35°
- Appropriate for use with handheld angle grinders

Technical Specifications

- Diameter: 230mm
- Thickness: 6mm
- Bore: 22mm
- Grain designation: A30S
- Grain: 30-Medium/Coarse
- Hardness: Medium
- Bond type: Resinoid reinforced (BF)
- Maximum operating speed: 6,600rpm

Standards

EN12413
oSa Approved

Note.
Not to be used for 'freehand' or wet grinding.
Max speed 80m/s.
