YORK ABRASIVES

DATA SHEET

355mm Flat Cutting Disk - Type 41 - Aluminium Oxide - A24NBF

Aluminum oxide is the most commonly used abrasive. Best-suited for general purpose deburring and blending, it is tough, economical and fracture resistant. Commonly used on ferrous alloys, high-tensile materials and wood.

"Special Series" cutting discs are perfect for general-purpose use on metals.

Features and Benefits

- Manufactured to assure operator safety and optimum performance
- For use with chop saws/cut-off machines subject to bore compatibility
- Not to be used for wet cutting

Technical Specifications

- Diameter: 355mm
- Thickness: 3mm
- Bore: 25mm
- Grain designation: A24NBF
- Grain: 24-Coarse
- Hardness: Soft
- Bond type: Resinoid reinforced (BF)
- Maximum operating speed: 6,600rpm

Standards

EN12413

Note.
Cutting discs must never be used for grinding and must always be presented to the work piece at an angle of 90°.
Max speed 80m/s.
