Bicycle Set Torque 1, 2.5-25 Nm, 16 pieces

Click-Torque adjustable torque wrenches with reversible ratchet

For the road and the workshop

The Bicycle Set Torque 1 contains tools for the most popular screw profiles on road bikes, mountain bikes and e-bikes. With the included Click-Torque A torque wrench (2.5-25 Nm), even torque-sensitive screwed connections can be loosened and tightened reliably. Clear and compact tool storage in the textile box.

Click-Torque Wrench series

Click torque wrench in unmistakable Wera design.

Exact

Precision of $\pm 4\%$ as per DIN EN ISO 6789-1:2017-07.

Easy and safe

Easy setting and saving of the desired torque value; easy to read on main and fine scales.

Setting with Speed

With audible and tactile locking when the scale values are reached.

Release mechanism

On reaching the desired torque value, an audible and tactile mechanism is triggered.

Bit sockets with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Manual and machine sockets

The manual and machine sockets can be used both for hand and power tools use (non-impact). Users need just one socket set for all applications.
